# FREEDOM OR DEATH.

Cuban Convention Decided on No Compromise.

WILL NOT ACCEPT AUTONOMY.

Nothing That the Spanish Government May Be Willing to Grant Will Be Taken-The Cuban Question Must Be solved This Time For Good.

NEW YORK, Nov. 27.-The Cuban constituent assembly, which met recently at Camaguey to remodel the constitution and elect a new president, issued a manifesto which has reached the office of the Cuban junta in this city. The document is dated at Layaya, Oct. 30, 1897, and is signed by Domingo Mendez Capote, as president of the assembly. The manifesto is addressed by "the representatives of the Cuban people to all those who have the independence and future welfare of Cuba at heart."

The document says that the assembly, before adjourning, deemed it its duty to proclaim, among other things,

"No special laws, no political reform er autonomy, nothing in short that the Spanish government may be willing to grant that means Spanish sovereignity over Cuba shall be accepted by the Cubans as a settlement of the war.

Independence or death is and shall be the unalterable and sacred motto of the Cubans.

"The Cabans have not resorted to arms in order to obtain any political measure which does not once and for all solve the Cuban question. That is the reason we will accept nothing short of absolute independence.

"It is our purpose to constitute an independent state, orderly, prosperous and happy, over the ruins of a worn

We are firmly determined to carry on the war until victory or death crowns our efforts."

#### CHEERED FREE AMERICA.

Released Cuban Prisoners Caused a Riot at Porto Rico.

HAVANA, Nov. 27 .- Advices just received from Porto Rico say that a riot has occurred there. It appears that a steamer having on board a number of political prisoners recently released from the Spanish penal settlements on the African coast in accordance with the amnesty decree arrived there and the liberated men were allowed to land. They soon found their way to a drinking saloon, partook of stimulants and began cheering for the United States, crying "hurrah for free America." This demonstration was resented by the crowds about the place and rioting followed. The police were called apon to interfere and compel the liberated men to re-embark. During the disturbance the police captured the insurgent Colonel Alipo Sanchez, who is described as being incognito in Porto

The Spanish authorities have reeased from prison Thomas J. Jordan, a prisoner captured, according to the allegations, after the landing of an ex-Dedition by the American steamer Three Friends, and Manuel Hernandez, who is said to have been a member of another filibustering expedition. Both men were under sentence of death.

The government has also released from prison Juan Arias, Augustin Cossio, Emilio Belancourt and Rozendo Belancourt.

#### Denied by Hannis Taylor.

WASHINGTON, Nov. 27 .- It is stated at the Catholic university and by Hon. Hannis Taylor, late United States minister to Spain, that a severe attack of bronchitis necessitated the abandonment of his lecture set for Thanksgiving at the university. The report that the Spanish minister, Dupuy de Lome, requested that the university authorities not permit the lecture is denied by all parties concerned.

#### Cuban Criminal Lawyer Released.

ATLANTA, Nov. 27.-General J. A. Gonzales Lanuza, the famous Cuban criminal lawyer, who has been confined in a penal colony prison in North Africa for over a year, has been released. He is now on his way to Atlanta and will join his family some time next month.

#### Autonomy Decrees Published.

Madrid, Nov. 27.—The Official Gazette publishes this morning the royal decrees granting autonomy to Cuba and Porto Rico, thus removing the anxiety that had begun to be expressed on all sides as the result of the government's reticence and unexplained delay.

No Americans Imprisoned In Cuba. HAVANA, Nov. 27.-No American citizen is now confined in a prison in the island of Cuba.

Dishonest Election Officers Fined.

PHILADELPHIA, Nov. 27.—In the case of George Helmuth, Charles Wagner and Frederick McNevison, who pleaded

guilty on weanesday to making a laise return in the Third division of the Second ward, at the recent election, Judge Bregy imposed the following sentence: "Five hundred dollars fine, nine months' imprisonment, disfranchisement for four years and disqualification from holding office for a period of seven years."

THE UNITED STATES NAVY.

as It Should Be.

WASHINGTON, Nov. 27.-The future of armor plate is not touched on by Secretary Long in his report to the president, except as he arrives at the conclusion that the present strength of the navy may be considered almost equal to any emergency likely to confront a nation that invites no quarrels, and that the work of congress and the department will be merely to maintain its strength and efficiency.

The annual report of the secretary of

the navy deals with the number and character of the various fighting craft owned by the United States, and with the auxiliary fleet, consistining of 20 subsidized steamers, ranging from 2,000 to 12,000 tons, with a large number of other merchant marine steamers available in time of need.

The need of improved dock facilities is noted.

Larger appropriations are recommended for the naval militia.

There are now 1,508 officers on the active list of the navy, drawing a total of \$3,414,500 pay; there are 468 officers on the retired list, drawing \$1,036,976; there are 11,000 petty officers, seamen and enlisted men, drawing \$3,408,895.

THE PRESIDENT AGREES.

In Full Accord With Gage's Proposed Currency Recommendations.

WASHINGTON, Nov. 27.—The annual report of the secretary of the treasury, according to present plans, will be sent to congress either on the first or second day of the coming session. As to the secretary's plans for the reform of the currency enough has been learned to give confidence that the president is in full accord with his views and recommendations, although in his official utterance as expressed in his forthcoming message to congress he may not give a complete and specific endorsement to all the propositions covered by the secretary's report. There will, however, be no difference between the president and the secretary.

it is also understood that the forthcoming report of the monetary commission will cover recommendations not essentially different from those embodied in Secretary Gage's report to congress. Those most familiar with both of these important papers give surance that the difference between them will be easily reconc led and that to the s port of the propositions so harmonized the monetary commission will be able to bring the powerful in-fluence of the great body of business men which the commission represents.

WASHINGTON, Nov. 27.-The secretary of war has received an appeal for help from Louisiana, where the levees are said to be in danger opposite New

#### REVOLT IN A JAIL.

The Sheriff Rescued and Then Gave the Ringleader a Terrible Beating.

PRINCETON. Ind., Nov. 27.-Nineteen prisoners confined in the Gibson county jail declared themselves in open revolt against Sheriff Murphy. For several days ugly threats have been made by the prisoners and the sheriff had been warned. The men declared they would have more food or kill the sheriff. A posse of deputies was placed outside the jail while Sheriff Murphy entered

alone. As soon as he closed the door all the prisoners, headed by John Boger, a notorious criminal, rushed upon him and were about to carry out their threats when the posse rescued the sheriff. A fierce fight then occurred between Boger and Murphy and Boger was beaten almost into insensibility and then thrown into a cell. Burned His Wife Then Tore Away Flesh. The Woman Dies.

ERIE, Pa., Nov. 27.-The wife of Antonio Milagno has died a most horrible death. Thanksgiving day Antonio became drunk and went to the cellar to get more liquor. He fell and his wife came to his assistance with a a lamp, but he threw a hammer at her head and missed the mark.

He then came upstairs with a can of oil and tar, which he threw in his wife's wife's face. In an instant the mixture caught fire from the lamp and she was enveloped in flames. Help arreved in time to prevent her from burning up where she stood.

The woman was laid on her bed, and when the officers arrived they found Antonio standing over his wife pluck-ing the cooked flesh from her breast and arms in fiendish glee and cursing like a demon. When he was arrested he raved and had to be subjected to rough treatment before he could be taken to the police station.

Bishop Vincent, who conceived the idea of holding the conference, and Bishop Warren, who has been present at most of the sessions, both expressed CLEVELAND, Nov. 27.-Information themselves as satisfied with the work from reliable sources in Cleveland is to done. The enthusiasm has been unbounded and the papers read have been carefully prepared and full of food for thought.

The devotional exercises were the brief but impressive Chautauqua Sun day services, conducted by Rev. Dr. George W. Izer, pastor of Calvary M. E. church, Allegheny. Dr. T. P. Marsh, the retiring president of Mt. Union college, presided. The congregation and leader joined in the usual responsive readings, after which the general confession and apostles' creed were repeated in concert. The services closed with the singing of the "Gloria Patri" and the benediction.

The members of the congress are still busy discussing the address of B. P. Browne, LL. D., of Eoston. It was "The Ethical Legislation of the Church," and the speaker held that piety could not be legislated into any person. Everyone must judge for himself what was right or wrong in the amusement line. The paper raised a storm of objections from certain members of the congress, and they are still criticising the theory of the address. The latter held for a strict enforcement of church rules.

Bishop Vincent said that he was fully in sympathy with the paper. Rev. Charles H. Talmage of Boston said that the matter would have to be settled at the next general conference.

In speaking of the permanent organization of the congress, Bishop Vincent said none would be effected at present. The next congress would be held in Chicago a year hence, and the same executive committee of ten that issued the call for the present one would continue in office.

## MANY HOUSES WRECKED.

Great Dama ;e Done by an Explosion of Nitroglycerin In Indiana.

ANDERSON, Ind., Nov. 27 .- Chesterfield. Ind., was almost wiped off the map by the explosion of almost 80 quarts of nitroglycerine, which had been brought overland from Montpelier and placed in an open field, a half mile from the town. Marion Mansey and Sam Maguire were working at a gas well near by when the explosion occur red. Mansey was thrown 50 feet, but not fatally injured. Maguire was also thrown 100 feet in the air and badly lacerated, but will recover. James Gold's house, 300 rods distant, was torn to pieces. A three-ton engine was torn to fragments and every living animal was killed instantly. The little town of Chesterfield is a mass of ruins; every house was moved from its foundations. windows shattered, doors smashed in every light put out and the plastering shaken from the walls. Several people were shaken out of bed.

At Dalesville, two miles away, and at Yorktown, five miles distant, the damage was almost as great. Many people were injured, and it is a miracle that none were killed outright.

The jar of the explosion was felt for 15 miles in all directions. The gas in the well was blown out and a workman named Cooper lit it and caused another explosion, in which he was fatally burned.

Heavy Exports the Feature of the Week, Says Dun.

Iron Industry Shows No Decrease In Production or Consumption of Pig. Wool Manufacturers Still Busy With Past Orders-The Failures.

NEW YORK, Nov. 27 .- R. G. Dun & Co.'s Weekly Review of Trade issued today says: The heavy exports of wheat, with the renewed advance in price is the most interesting and important feature of the week. Since Aug. 1, when the extent of foreign deficiency became realized, exports have been larger than in corresponding weeks of any previous year. The cotton exports al o have become very heavy, and the outgo of corn falls but little below last year's unprecedented record, while in exports of manufacturing products, especially machinery, all records for the season have been surpassed. While the aggregate for November last year was over \$109,000,000, shipments from New York for three weeks have been but slightly smaller, with a fair prospect that the known increase in cotton and other products from other ports may make up the deficiency. Meanwhile imports are running behind last year's, at New York, nearly \$2,000,000 this month, so that another excess of exports over imp rts amounting to about \$60,000,000 for the month is probable. But this would make an excess of about \$225,000,000 in four months.

After the slight decline last Saturday wheat rose to \$1.0018 for November, with No. 2 red and other grades selling many cents higher. Yet western receipts are of enormous magnitude. In four weeks 27,072,104 bushels, against 2,914,838 bushels in the same four weeks last year, while Atlantic exports, flour included, were for the week 3,628,445 bushels, and for four weeks, 13,429,839 bushels, against 7,-737,685 bushels last year. The shipments from other ports have also been heavy, and neither appears to change former estimates of European needs. Corn also cont nues to go abroad in quantities almost as large as last year. when all past records were broken, but the price has slightly declined.

The iron industry shows no decrease production or co insumption of pig but with much reduced orders for products excess of production is expected, and Bessemer falls a shade to \$10.15 and Grey torge to \$9.25 at Pittsburg, though Chicago and eastern markets show no change. Billets are also weaker; at Pittsburg, \$15. Expectation of lower prices tends to produce them at a time when new business is naturally small and the mills are working mostly on old orders, with buyers impatient for deliveries. Other large orders are held back in plates by inability of the works to deliver in the time desired. In bars, agricultural and railway manufacture cause some heavy demand at Chicago, iron being preferred to steel, and thin sheets are also in better demand, but bars are a shade lower at Pittsburg and both wire and steel nails. Some large orders for rails by

eastern railways are reported. The woolen manufacture is still consuming heavily in execution of past orders, and many agents are sold so far ahead that they seek no further business, while others are beginning to question whether the demand for the next season will suffice if prices are made to correspond with present quota tions of wool. Some reductions in prices of wool appears, possibly averaging half a cent, with sales of Australian amounting to 2,700,000 pounds, in a few large blocks at Boston, but the tone is still strong.

No change has occurred in the cotton manufacture and the market for its products is still :rregular.

Failures for the week have been 236 in the United States, against 300 last year, and 25 in Canada, against 38 last

#### A BRUTAL HUSBAND.

Burned His Wife Then Tore Away Flesh. The Woman Dies.

ERIE, Pa., Nov. 27.-The wife of Antonio Milagno has died a most horrible death. Thanksgiving day Antolar to get more liquor. He fell and his wife came to his assistance with a a lamp, but he threw a hammer at her head and missed the mark.

He then came upstairs with a can of oil and tar, which he threw in his wife's wife's face. In an instant the mixture caught fire from the lamp and she was enveloped in flames. Help arreved in time to prevent her from burning up where she stood.

The woman was laid on her bed, and when the officers arrived they found Antonio standing over his wife plucking the cooked flesh from her breast and arms in fiendish glee and cursing like a demon. When he was arrested he raved and had to be subjected to rough treatment before he could be taken to the police station.

THE M. E. CHUNCH CONGRESS.

Meeting Adjourned at Pittsburg to Meet Next Time In Chi ago

PITTSBURG, Nov. 27.—The last day's session of the Methodist Episcopal church congress, in Christ church, Center and Laberty avenues, East End. attracted as large an attendance as the previous ones.

Bishop Vincent, who conceived the idea of holding the conference, and Bishop Warren, who has been present at most of the sessions, both expressed themselves as satisfied with the work done. The enthusiasm has been unbounded and the papers read have been carefully prepared and full of food for thought.

The devotional exercises were the brief but impressive Chautauqua Sun day services, conducted by Rev. Dr. George W. Izer, pastor of Calvary M. E. church, Allegheny. Dr. T. P. Marsh, the retiring president of Mt. Union college, presided. The congregation and leader joined in the usual responsive readings, after which the general confession and apostles' creed were repeated in concert. The services closed with the singing of the "Gloria Patri" and the benediction.

The members of the congress are still busy discussing the address of B. P. Browne, LL. D., of Boston. It was "The Ethical Legislation of the Church," and the speaker held that piety could not be legislated into any person. Everyone must judge for himself what was right or wrong in the amusement line. The paper raised a storm of objections from certain members of the congress, and they are still criticising the theory of the address. The latter held for a strict enforcement of church rales.

Bishop Vincent said that he was fully in sympathy with the paper. Rev. Charles H. Talmage of Boston said that the matter would have to be settled at the next general conference.

In speaking of the permanent organization of the congress, Bishop Vincent said none would be effected at present. The next congress would be held in Chicago a year hence, and the same executive committee of ten that issued the call for the present one would continue in office.

Rev. Herbert Welch, A. M., of Brooklyn, read an interesting paper on "The College Student and the Christian Confession.

Chancellor McDowell, Ph. D., of Denver followed with a talk on the

same subject. Miss Gertrude Buck, A. M., of Vassar college, read a paper on "The Spiritual Reward of Higher English Schol-

MANY HOUSES WRECKED.

Great Dama :e Done by an Explosion of Natroglycerin In Indiana.

ANDERSON, Ind., Nov. 27.-Chesterfield. Ind., was almost wiped off the map by the explosion of almost 80 quarts of nitroglycerine, which had been brought overland from Montpelier and placed in an open field, a half mile from the town. Marion Mansey and Sam Maguire were working at a gar well near by when the explosion occur red. Mansey was thrown 50 feet, but not fatally injured. Maguire was also thrown 100 feet in the air and badly lacerated, but will recover. James Gold's house, 300 rods distant, was torn to pieces. A three-ton engine was torn to fragments and every living animal was killed instantly. The little town of Chesterfield is a mass of ruins; every house was moved from its foundations. windows shattered, doors smashed in. every light put out and the plastering shaken from the walls. Several people were shaken out of bed.

At Dalesville, two miles away, and at Yorktown, five miles distant, the damage was almost as great. Many people were injured, and it is a miracle that none were killed outright.

The jar of the explosion was felt for 15 miles in all directions. The gas in the well was blown out and a workman named Cooper lit it and caused another explosion, in which he was fatally burned.

Heavy Exports the Feature of the Week, Says Dun.

THE PRICE ALSO INCREASED.

Iron Industry Shows No Decrease In Production or Consumption of Pig. Wool Manufacturers Still Busy With Past Orders-The Failures.

NEW YORK, Nov. 27 .- R. G. Dun & Co.'s Weekly Review of Trade issued today says: The heavy exports of wheat, with the renewed advance in price is the most interesting and important feature of the week. Since Aug. 1, when the extent of foreign deficiency became realized, exports have been larger than in corresponding weeks of any previous year. The cotton exports al o have become very heavy, and the outgo of corn falls but little below last year's unprecedented record, white in exports of manufacturing products, especially machinery, all records for the season have been surpassed. While the aggregate for November last year was over \$109,000,000, shipments from New York for three weeks have been but slightly smaller, with a fair prospect that the known increase in cotton and other products from other ports may make up the deficiency. Meanwhile imports are running behind last year's, at New York, nearly \$2,000,000 this month, so that another excess of exports over imp rts amounting to about \$60,000,000 for the month is probable. But this would make an excess of about \$225,000,000 in four

months. After the slight decline last Saturday wheat rose to \$1.0018 for November, with No. 2 red and other grades selling many cents higher. Yet western receipts are of enormous magnitude. In four weeks 27,072,104 bushels, against 2,914,838 bushels in the same four weeks last year, while Atlantic exports, flour included, were for the week 3,628,445 bushels, and for four weeks, 13,429,839 bushels, against 7,-737,685 bushels last year. The shipments from other ports have also been heavy, and neither appears to change former estimates of European needs. Corn also cont nues to go abroad in quantities almost as large as last year. when all past records were broken, but the price has slightly declined.

The iron industry shows no decrease in production or consumption of pig. but with much reduced orders for products excess of production is expected, and Bessemer falls a shade to \$10.15 and Grey forge to \$9.25 at Pittsburg, though Chicago and eastern markets show no change. Billets are also weaker; at Pittsburg, \$15. Expectation of lower prices tends to produce them at a time when new business is naturally small and the mills are working mostly on old orders, with buyers impatient for deliveries. Other large orders are held back in plates by inability of the works to deliver in the time desired. In bars, agricultural and railway manufacture cause some heavy demand at Chicago, iron being preferred to steel, and thin sheets are also in better demand, but bars are a shade lower at Pittsburg and both wire and steel nails. Some large orders for rails by

eastern railways are reported. The woolen manufacture is still consuming heavily in execution of past orders, and many agents are sold so far shead that they seek no further business, while others are beginning to question whether the demand for the next season will suffice if prices are made to correspond with present quota tions of wool. Some reductions in prices of wool appears, possibly averaging half a cent, with sales of Australian amounting to 2,700,000 pounds, in a few large blocks at Boston, but the tone is still strong.

No change has occurred in the cotton manufacture and the market for its products is still :rregular.

Failures for the week have been 236 in the United States, against 300 last year, and 25 in Canada, against 38 last

A Marger Accomplice Arrested.

NEWARK, N. J., Nov. 27 .- James A. Ciemmer of Norristown. Pa., has been arrested here on the charge of complicity in the murder, on Oct. 26, 1896, of Mrs. Emma P. Kaiser, who went driving in company with her husband, Charles O. Kaiser, James A. Clemmer and Elizabeth L. DeKalb. The woman was brought back dead and a story of highway robbery told. The woman was evidently murdered for life insurance. Kaiser has been sentenced to hang. Clemmer admitted he was the nan wanted.

## **WADE'S JEWELRY STORE**

The Finest In All This Section of Country.

BEAUTIFUL HOLIDAY PRESENTS

The Readers of the News Review Will Do Well to Examine Them. Exquisite Sterling Silver Novelties, Superb Jewelry, Elegant China Ware, Foreign and Domestic.

East Liverpool can now justly lay claim to a superb jewelry establishment, fitted out in the most elegant manner, reflecting credit upon owner and city alike. It is an establishment in which can be found anything and everything common to the jewelry business, the hustling manager, WADE, demonstrating the fact that he alway stands ready to cater to the purchasing public in an acceptable manner, ever prepared to furnish customers anything they may desire in his line of business.

#### Sterling Silver Novelties.

The holidays are near at hand, and patrons are anxious to secure something in this line, and they cannot find, in all this section of country, such exquisite novelties as are now being displayed at WADE'S. Seeing is believing, when you deal with an honorable business man, and your eyes will convince you that the above statement is true.

#### Pocketbooks and Purses.

Here can be found goods which cannot be surpassed anywhere. Elegant pocketbooks for ladies and gentlemen. They are simply superb in design and finish, and must be seen in order to be fully appreciated.

#### Fine Chinaware.

This line of goods is sure to win warm approval and commendation. You can take your choice of the very nicest productions of the potteries, foreign or domestic. Some of the Japanese manufactures are attracting great attention.

Cut Glass Novelties.

There are genuine beauties now on exhibition in this department, and there is no nicer present to give to a lady or gentleman friend. You will do well to inspect these goods.

#### Manicure Sets.

The samples on exhibition at WADE'S vill most assuredly result in an investment therein, in case you need anything | shock staggered me, and something fell in this line, as they are the very nicest manufactured, the product of the most famous manufactories at home or abroad.

#### Jewelry.

Are you going to invest in a watch, clock, bracelet, charm, gold ring, diamond ring, or rings adorned with any class or character of precious stones? If you are, then WADE can and will fill the bill for you, and at really remarkable prices.

#### To the Public.

The manager of this fine establishment extends to the public at large a cordial invitation to visit his storeroom and note the extensive improvements just being finished, and also to inspect the really superb stock of goods. The storeroom has been done in the most arfavorable comment.

Two magnificent wall cases, for the display of goods, will shortly be placed in position. The cases are of solid oak, of finest finish, thirty feet in length by ten feet in height.

#### Repairing Department.

The patronage of this establishment has increased wonderfully of late, especially in the line of the repairing of fine watches, which are engraved free of charge; this requires the services of two skilled workmen, aside from the manager, who has found it an imperative necessity to invest in a fire proof and burglar proof safe. WADE believes in the grand old adage that "the best is the cheapest in the long run," and has had placed in position the very best safe money can procure, manufactured in Hamilton, Ohio, by the famous Mosler Safe company. It is indeed a marvel of ingenious mechanism, very handsome and quite costly. This safe weighs over four tons, and is finished in silver bronze. You can leave your valuable watches and jewelry with WADE, and have the assurance that they are secure and in SAFE hands.

Don't forget the location of this jewelry headquarters, Market street, Foutts & Stevenson building. You will be accorded a warm welcome.

By the way, ladies and gentlemen of East Liverpool, don't forget, when promenading about our thoroughfares, to take a glance at the handsome show windows of this jewelry headquarters, and remember that the beauties there displayed are but reminders of the elegant line of goods in the main buildCostly Pipes.

Among the pipes shown at a jewelry establishment was one of meerschaum, with an amber mouthpiece, the bowl being crowned with a gold mounting that covered the rim around the top and extended down the sides to the depth of perhaps a quarter of an inch below the edge. On top the mounting was flat and smooth; below the edge, on the sides, it was etched. The price of this pipe was \$110. The owner of a pipe with a gold rim around the top might smoke it, or it might be that he would let it lie on his table.

Jeweled pipes are not an article of common sale, but they are not so uncommon as to be remarkable. Such pipes are usually mounted to order, and they are probably always bought for gifts. They are variously mounted, sometimes with a band of diamonds and rubies around the bowl at the top, sometimes diamonds are set around the stem where the mouthpiece joins it. A jew eled pipe may cost \$250.

Silver mounted meerschaum pipes at \$50 are articles of regular sale. There are pipes of this sort at prices ranging from \$20 to \$75. These are not carved pipes, but usually perfectly plain. They are of the finest materials and workmanship and of fine designs.

There are perfectly simple little brier pipes with a plain silver mounting and amber mouthpiece that sell at \$15, but the brier is the very choicest and handsomest, the amber mouthpiece of the finest quality and joined to the pipe by a lock stem, and all the workmanship on the pipe is of the best. They are the very finest of brier pipes.-New York

#### An Absentminded Man.

"Writers for comic papers and their unthinking readers," said Mr. Werkenday, "consider it funny to be an absentminded man. I am absentminded and in a position to contradict them. This morning I was hurrying across Wall street to keep an appointment. I lit a cigar without checking my pace, for I was late, and the appointment meant much for me.

'A few minutes ster and I happened to put my hand in my pocket and missed my new silver matchsafe. Of course I retraced my steps in a hurry, scanning every inch of sidewalk and gutter anxiously. So occupied, naturally I collided more or less severely with people, who, not having lost a silver matchsafe, might have kept out of my way, I think.

"However, they did not, and by the time I reached William street my hat had been knocked off, the polish of my shoes had been ruined by strange feet, and one of my new gloves had disap-

"At William street a very fat man out of my hand and clattered on the pavement. It was my new silver matchsafe. I picked it up with unkind reflections about myself, and a little mental arithmetic showed me that I had made an absentminded fool of myself at a cost of 5 cents for a shine, \$1 to get my hat blocked and \$2.25 for a pair of gloves, ruined by the loss of one. And then, gentlemen, I walked serenely to my office, and it never struck me until two hours afterward that I had quite appointment. - New York Press.

#### Cabinet of Curiosities.

The Professional Woman's league is proud of a cabinet of curiosities which stands in the drawing room and is, it hopes, the nucleus of a rare collection. There are the dagger used by the late E. L. Davenport in "Othello," a scarf papering and decorating of the enlarged of white satin embroidered in gold and a jeweled Maltese cross belonging to tistic manner, and is the subject of much Fanny Kemble; a medallion of carved coral once the property of Adah Isaacs Menken, autographed slippers of Patti and Melba and boots worn by Mrs. D. P. Bowers. There are also jeweled gloves worn by Miss May Brookyn. The caricature sketches, pen and ink, made by the late Sol Smith are most interesting. A yellow satin gown is there which was worn by Mrs. W. G. Jones at the New Bowery theater in 1864, and which originally belonged to Mrs. Farren, and a spangled dress which Miss Louisa Mortimer (Mrs. Louisa Eldridge) wore at the age of 18. Mme. Ponisi's slippers in which she trod the boards in the character of Romeo in 1855 are exhibited. An old fashioned decanter used by the late William Warren, a jeweled necklace worn by the late John R. Scott and old engravings of Jenny Lind and David Garrick are numbered among the relics. - New York Tribune.

#### Wheat Went to a Dollar.

NEW YORK, Nov. 27 .- After several weeks of unsatisfactory markets, "dollar wheat," in the speculative accept ance of the term, was realized on change. The December option early attained that and soon passed it, reaching \$1.0038, which was also the final price.

St. Louis, Nov. 27.—Madison C. Stookey of Bellville, Ills., deputy district internal revenue collector and one of the best known men in Southern Illinois, has been found dead under a trestle crossing Wamser creek, a mile beyound Clumbia, Ills. It is supposed that he fell from a train.

#### West Virginia Postmanters.

WASHINGTON, Nov. 27 .- The president has appointed the following postmasters in West Virginia: Clarksburg, Stuart F. Reed; Wheeling, George Wise.

#### EPWORTH LEAGUE.

Lesson For the Week Beginning Nov. 28. Comment by Rev. W. J. Yates, A. M.-Topic, The Divine Panoply.

SCRIPTURE READING.-Eph. vi, 14-18.

The sight of soldiers was a familiar one to Paul, and his writings have frequent reference to them. He often compares the Christian to a soldier. This figure has been a favorite one with religious writers. In this passage the apostle compares the virtues of Christian character to the armor commonly worn by Roman soldiers in his time.

Truth.—This is like a belt or girdle wound around the waist. Greatly does it strengthen one who has heavy burdens to lift or carry. It prevents straining and rupture. It is the first and indispensable need of every follower of Christ. Be true! This is much more than telling the truth. See the truth in all things; search till it be found, whatever the cost. Rest not in any half truth. Love it, cling to it at all sacrifice. Surrender life first. Live it. Girdle yourself with it. Here only is strength in the day of battle and wrestling. All else is weakness.

Right, Rightness, Righteousness.-The basis of all right is an eternal truth and the foundation of truth is the nature of God. Things are as they are because God is as He is. Truth appeals to the reason. It is the real and reasonable. Opposed to it is the false. Whatever is true to the reason is right for the will to perform. It then becomes the law to man. God says, "Thou shalt." And man feels, "I ought, because this is du-Righteousness is doing what one ought. What his reason shows to be true, his soul recognizes, he ought to love and perform. It is like a breastplate. It covers the heart and protects it. Only as a man does his duty and lives rightly does his heart rest in peace. This is holiness. Neglect of it is wrong doing and sin.

Peace. - A Christian is under obligation to make peace wherever he goes. He 'is never to stir up strife. His feet are not to be swift to run into mischief. "How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace!'

Faith. - This is like a shield. Doubts arise. All things must be tested. Intellectual things must be subjected to the test of reason. No one is under obligation to believe the unreasonable, the false or absurd. No one can believe it. Whoever says he does so believe either misunderstands or speaks lies. Faith is conviction of the reality and truth of a matter. It is confidence. It comes after investigation and proof. It is not dependent on a full course of reasoning. Our firmest knowledge does not rest on a process of argument, but is intuitive. We know a thing to be true, but cannot tell how we know it to be so. We trust without a fear or doubt in many cases where we have never fully investigated. So our faith in God is firm, not because we can understand all His nature and plans, but knowing some of His truth we have confidence in His wisdom and love and all doubts are broken on this buckler of faith.

Salvation. - A person can know he loves God and his fellow men and be forgotten to keep that highly important conscious of salvation. This consciousness covers him like a helmet and keeps his powers of thinking safe.

> The Word.-No substitute can be found for the Bible as the Christian's best weapon of defense. It is truly the sword of God's Spirit.

#### Needs and Wants.

There is great difference between them. The wants of most people are many and complex. Their real needs are much fewer and often very simple. If one wishes for peace of mind and any great measure of success in this world, he must learn to reduce his wants as nearly as possible to necessary things. It is not at all essential that a person be rich, but many people wish to be and make haste to be. The result is anxiety and oftentimes loss of integrity, and failure to reach the real needs of one's being. Happiness never lies in satisfaction of our wants, because these ever become greater as we try to satisfy them. "Contentment is better than wealth" and a quiet spirit which trusts God to supply all our needs and patiently performs the daily task in sweet thankfulness for mercies received is a richer heritage than broad acres and wealth in goods.

Social and literary work must not be neglected. Too largely the various clubs and social organizations in the community engage the attention and occupy the time of our young people. Our com panionship should be largely found among ourselves. Rally around the church. Let this be the center of all activity. Here is ample room for all social and literary activity.

#### Nobility.

True worth is in being, not seeming; In doing each day that goes by Some little good, not in the dreaming Of great things to do by and by. For whatever men say in blindness And spite of the fancies of youth, There's nothing so kingly as kindness And nothing so loyal as truth.

We get back our mete as we measure We cannot do wrong and feel right, Nor can we give pain and gain pleasure, For justice avenges each slight. The air for the wing of the sparrow The bush for robin and wren, But always the path that is narrow And straight for the children of men

'Tis not in the pages of story The heart of its ills to beguile, Though he who makes courtship to glory Gives all that he hath for her smile, For when from her heights he has won her. Alas, it is only to prove That nothing's so sacred as honor

And nothing so loyal as love!

Through envy, through malice, through

Against the world early and late, No jot of our courage abating, Our part is to work and to wait. And slight is the sting of his trouble Whose winnings are less than his worth, For he who is honest is noble. Whatever his tortunes or birth.

#### AUSTRIAN STATESMEN EJECTED.

The Rio ing Resumed at the Sitting of the L wer House at Vienna.

VIENNA, Nov. 27 .- The disorder in the lower house of the reichrath was so accentuated that a strong detachment of police had to be called in to preserve order.

When the president of the house, Abrahamovics, entered he was greeted with vociferous shouts of "get out." The Leftists rose to their feet in a body, many of the deputies shrieked wildly and an indescribable tumult followed.

During the tumult a Social Democrat, Herr Berner, made a rush for the president and a lively fist fight followed between Berner and the house attendants who attempted to protect the chair.

Thereupon another Social Democrat, Herr Resel, jumped upon the ministerial bench and, hurrying to the presidential. chair, seized the papers which were lying on the president's desk and tore them to pieces, while other Social Democrats hastened to Herr Berner's assistance, occupied the tribune and demanded satisfaction for the attendants' pummeling of Herr Berner. President Abrahamovics was compelled to flee.

Subsequently the Social Democrats and other deputies indulged in a free fight and Herr Berner was ejected from the house.

Finally Herr Wollf and 12 other deputies were suspended, some being ejected, upon the return of the president to the house.

It is estimated that a crowd of 10,000. including a very large number of students, assembled on the streets and threatened the government with revolution and Count Badeni, the premier, with the guillotine. An attempt was made to attack Count Badeni's house. The police repeatedly char ed the crowd and several persons were injured.

MRS. NACK DID NOT APPEAR.

State In Thorn Trial Failed to Put Her on the Stand.

NEW YORK, Nov. 27.- Lawyers Howe and Moss, who have dirigently defended Martin Thorn, met with a serious and unlooked for obstacle when, after a brief adjournment, District Attorney Youngs informed the court that the people rested their case.

It was generally expected that Mrs. Nack would be put on the stand to 1eiterate her confession, and the lawvers who had been assigned to look after Thorn's interests thought that she would repeat her statement of two weeks ago.

Mrs. Nack, who had made such a famons scene in the first trial by her conession, would be produced or not. The case, as far as the district attorney's opinion went, was fully proved without the woman's testimony. Later on, however, one of Mr. Young's advisers said that in case the defense put Martin Th rn on the stand the prosecution would certainly produce Mrs. Nack in rebuttal.

COFFEE SELLING VERY LOW.

Owing to the Fight, It Is Cheaper Than Since Before the War.

NEW YORK, Nov. 27 .- As a result of the war now being waged between the Arbuckle Coffee company and the Woolson Spice company, the sales of coffee during the week now ending have been far in excess of any similar period during the past year. Coffee brokers declared that their sales had been doubled.

The Woolson Spice company, which is controlled by the Havemeyers, is selling Rio No. 7 at 9 cents a pound. Not to be outdone, the Arbuckles have made a reduction in their prices. Coffee is now cheaper than it has been since before the war, say old dealers, and if the fight lasts there is no teiling at what price it will go for. Another reason for the low price is to be found in the enormous quantity of green coffee now here.

LOVERING'S PUNISHMENT.

The Courtmartial Decided That He Must Receive a Reprimand.

CHICAGO, Nov. 27.-The finding of the courtmartial is that the accused is guilty as charged in the specifications, and "that he be reprimanded by the reviewing authority. The court is thus lenient in view of the good character of the accused as shown in the evidence.

The foregoing is, according to the statement of a man who knows, the exact verdict of the courtmartial which has just completed its labors in the case of Captain Leonard A. Lovering of Ft. Sheridan, charged with brutal trea: ment of Private Charles Hammond. Hammond's bad record lightened the

verdict against Lovering.

#### Fatal Fight Among Negroes.

LEWES, Del., Nov. 27 .- During a fight at a colored festival, Cephas Miller. a Virginia negro, shot and killed John E.

man who courts death through some inside ous disease is pitiable, but not admirable That dread disease, consumption, slays more men and women than are slain by war, famine and pestilence combined. It is an utterly unnecessary slaughter.

Consumption is curable. One of the most eminent specialists in the world, Dr. R. V. Pierce, for thirty years chief consulting physician to the Invalids' Hotel and Surgical Institute at Buffalo, N. Y., so pronounces it. He declares that thirty years ago he discovered a medicine that cures of er cent. of all cases of consumption. In per cent. of all cases of consumption. In his great medical work, "The Common Sense Medical Adviser," the names, ad-dresses, experiences and photographs of innumerable consumptives who have recovered are given. This wonderful medi cine is known as Dr. Pierce's Golden Med ical Discovery. It is the greatest of all known blood-makers and flesh-builders. It gives edge to the appetite, makes digestion and assimilation perfect, renders the liver and kidneys active, makes the blood pure and fills it with the life-giving elements that build new and healthy tissue. strengthens the muscular system, tones the nerves, pumps rich, red, healthy blood into every vital organ, and acting directly on the lungs drives out all impurities and disease germs. Thousands have testified to its marvelous merits. An honest dealer will not try to persuade you to take a worthless substitute for the sake of a little added profit.

When baby is sick the mother needs to own a copy of Dr. Pierce's Common Sense Medical Adviser. It tells the home-treatment of all the or-

dinary ills of life. For a paper-covered copy send 21 one-cent stamps to cover cost of mailing only, to the World's Dispensary Medical Association. Buffalo, N. Y. For cloth binding 31 stamps. ITEMS OF INTEREST

#### Picked Up in the East End by Out Representative.

Our readers are indirectly indebted to Mr. Elmar Stevenson for the following East End items. In discussing some particulars about the new School Board and the E. L. Potters' Union with our representative he incidentally mentioned that he had been under the weather with a sore back, but had got over it and hat if our "Scribe" wanted the minute letails of a remarkable case, he ough e call on Mrs. Carlina White, of No 125 Railroad street. Hither he wended his vay and gleaned from that lady the foiowing: "I have taken Doan's Kidney in their use. My back has ached so long hat I have forgotten when I was his roubled. I am now 70 years of age and and about given up all hope of ever being helped. I have taken medicines but they did not prove very beneficial Later District Attorney Youngs said my back would ache just the same in that he was not prepared to say whether the region of the kidneys, and got stiff and lame when sitting long or when lying in bed, sharp twinges of pain and other symptoms convinced me that my kidneys were out of order. Always on the outlook for anything that might bring relief, when I heard Doan's Kidney Pills so highly spoken of I got a box at the W. and W. Pharmacy. After using them for a short time I could plainly notice the good effect they were causing I continued on them for some time longer and gradually but surely improved. found Doan's Kidney Pills a splendid remedy and advise others to try them feeling confident if they do so they will have no reason to regret it. I know of a number of people here in the East End that swear by Doan's Kidney Pills."

Doan's Kidney Pills are for sale by all dealers. Price 50 cents per box or 6 boxes for \$2.50. Sent by mail on receipt of price by Foster-Milburn Co. Buffalo, N. Y., sole agents for the U. S

## WADE'S JEWELRY STORE

The Finest In All This Section of Country.

BEAUTIFUL HOLIDAY PRESENTS

The Readers of the News Review Will Do Well to Examine Them. Exquisite Sterling Silver Novelties, Superb Jewelry, Elegant China Ware, Foreign and Domestic.

East Liverpool can now justly lay claim to a superb jewelry establishment, fitted out in the most elegant manner, reflecting credit upon owner and city alike. It is an establishment in which can be found anything and everything common to the jewelry business, the hustling manager, WADE, demonstrating the fact that he alway stands ready to cater to the purchasing public in an acceptable manner, ever prepared to furnish customers anything they may desire in his line of business.

#### Sterling Silver Novelties.

The holidays are near at hand, and patrons are anxious to secure something in this line, and they cannot find, in all this section of country, such exquisite finest quality and joined to the pipe by novelties as are now being displayed at WADE'S. Seeing is believing, when you deal with an honorable business man, and your eyes will convince you that the above statement is true.

#### Pocketbooks and Purses.

Here can be found goods which cannot be surpassed anywhere. Elegant pocketbooks for ladies and gentlemen. They are simply superb in design and finish, and must be seen in order to be fully appreciated.

#### Fine Chinaware.

This line of goods is sure to win warm approval and commendation. You can take your choice of the very nicest productions of the potteries, foreign or domestic. Some of the Japanese manufactures are attracting great attention.

Cut Glass Novelties.

There are genuine beauties now on exhibition in this department, and there is no nicer present to give to a lady or gentleman friend. You will do well to inspect these goods.

#### Manicure Sets.

The samples on exhibition at WADE'S will most assuredly result in an investment therein, in case you need anything | shock staggered me, and something fell | process of argument, but is intuitive. in this line, as they are the very nicest manufactured, the product of the most famous manufactories at home or abroad.

#### Jewelry.

Are you going to invest in a watch, clock, bracelet, charm, gold ring, diamond ring, or rings adorned with any class or character of precious stones? If you are, then WADE can and will fill the bill for you, and at really remarkable prices.

#### To the Public.

The manager of this fine establishment extends to the public at large a cordial invitation to visit his storeroom and note the extensive improvements just being finished, and also to inspect the really superb stock of goods. The papering and decorating of the enlarged storeroom has been done in the most artistic manner, and is the subject of much favorable comment.

Two magnificent wall cases, for the display of goods, will shortly be placed in position. The cases are of solid oak, of finest finish, thirty feet in length by ten feet in height.

#### Repairing Bepartment.

The patronage of this establishment has increased wonderfully of late, especially in the line of the repairing of fine watches, which are engraved free of charge; this requires the services of two skilled workmen, aside from the manager, who has found it an imperative necessity to invest in a fire proof and burglar proof safe. WADE believes in the grand old adage that "the best is the cheapest in the long run," and has had placed in position the very best safe money can procure, manufactured in Hamilton, Ohio, by the famous Mosler Safe company. It is indeed a marvel of ingenious mechanism, very handsome and quite costly. This safe weighs over four tons, and is finished in silver bronze. You can leave your valuable watches and jewelry with WADE, and have the assurance that they are secure and in SAFE hands.

Don't forget the location of this jewelry headquarters, Market street. Foutts & Stevenson building. You will be accorded a warm welcome.

By the way, ladies and gentlemen of East Liverpool, don't forget, when promenading about our thoroughfares, to take a glance at the handsome show windows of this jewelry headquarters, and remember that the beauties there displayed are but reminders of the elegant line of goods in the main build-

#### Costly Pipes.

Among the pipes shown at a jewelry establishment was one of meerschaum, with an amber mouthpiece, the bowl being crowned with a gold mounting that covered the rim around the top and extended down the sides to the depth of perhaps a quarter of an inch below the edge. On top the mounting was flat and smooth; below the edge, on the sides, it was etched. The price of this pipe was \$110. The owner of a pipe with a gold rim around the top might smoke it, or it might be that he would let it lie on his table.

Jeweled pipes are not an article of common sale, but they are not so uncommon as to be remarkable. Such pipes are usually mounted to order, and they are probably always bought for gifts. They are variously mounted, sometimes with a band of diamonds and rubies around the bowl at the top, sometimes diamonds are set around the stem where the mouthpiece joins it. A jeweled pipe may cost \$250.

Silver mounted meerschaum pipes at \$50 are articles of regular sale. There are pipes of this sort at prices ranging from \$20 to \$75. These are not carved pipes, but usually perfectly plain. They are of the finest materials and workmanship and of fine designs.

There are perfectly simple little brier pipes with a plain silver mounting and amber mouthpiece that sell at \$15, but the brier is the very choicest and handsomest, the amber mouthpiece of the a lock stem, and all the workmanship on the pipe is of the best. They are the very finest of brier pipes.-New York

#### An Absentminded Man.

"Writers for comic papers and their unthinking readers," said Mr. Werkenday, "consider it funny to be an absentminded man. I am absentminded and in a position to contradict them. This morning I was hurrying across Wall street to keep an appointment. I lit a cigar without checking my pace, for I was late, and the appointment meant much for me.

"A few minutes with and I happened to put my hand in my pocket and missed my new silver matchsafe. Of course I retraced my steps in a hurry, scanning every inch of sidewalk and gutter anxiously. So occupied, naturally I collided more or less severely with people, who, not having lost a silver matchsafe, might have kept out of my way, I think.

"However, they did not, and by the time I reached William street my hat had been knocked off, the polish of my shoes had been ruined by strange feet, and one of my new gloves had disap-

I picked it up with unkind reflections about myself, and a little mental arithmetic showed me that I had made an absentminded fool of myself at a we can understand all His nature and cost of 5 cents for a shine, \$1 to get my hat blocked and \$2.25 for a pair of gloves, ruined by the loss of one. And then, gentlemen, I walked serenely to my office, and it never struck me until two hours afterward that I had quite appointment. - New York Press.

#### Cabinet of Curiosities.

The Professional Woman's league is proud of a cabinet of curiosities which stands in the drawing room and is, it hopes, the nucleus of a rare collection. There are the dagger used by the late E. L. Davenport in "Othello," a scarf of white satin embroidered in gold and a jeweled Maltese cross belonging to Fanny Kemble; a medallion of carved coral once the property of Adah Isaacs Menken, autographed slippers of Patti and Melba and boots worn by Mrs. D. P. Bowers. There are also jeweled gloves worn by Miss May Brookyn. The caricature sketches, pen and ink, made by the late Sol Smith are most interesting. A yellow satin gown is there which was worn by Mrs. W. G. Jones at the New Bowery theater in 1864, and which originally belonged to Mrs. Farren, and a spangled dress which Miss Louisa Mortimer (Mrs. Louisa Eldridge) wore at the age of 18. Mme. Ponisi's slippers in which she trod the boards in the character of Romeo in 1855 are exhibited. An old fashioned decanter used by the late William Warren, a jeweled necklace worn by the late John R. Scott and old engravings of Jenny Lind and David Garrick are numbered among the relics. - New York Tribune.

#### EPWORTH LEAGUE.

Lesson For the Week Beginning Nov. 28. Comment by Rev. W. J. Yates, A. M .- Topic, The Divine Panoply.

SCRIPTURE READING.-Eph. vi, 14-18.

The sight of soldiers was a familiar one to Paul, and his writings have frequent reference to them. He often compares the Christian to a soldier. This figure has been a favorite one with religious writers. In this passage the apostle compares the virtues of Christian character to the armor commonly worn by Roman soldiers in his time.

Truth.—This is like a belt or girdle wound around the waist. Greatly does it strengthen one who has heavy burdens to lift or carry. It prevents straining and rupture. It is the first and indispensable need of every follower of Christ. Be true! This is much more than telling the truth. See the truth in all things; search till it be found, whatever the cost. Rest not in any half truth. Love it, cling to it at all sacrifice. Surrender life first. Live it. Girdle yourself with it. Here only is strength in the day of battle and wrestling. All else is weakness.

Right, Rightness, Righteousness.-The basis of all right is an eternal truth and the foundation of truth is the nature of God. Things are as they are because God is as He is. Truth appeals to the reason. It is the real and reasonable. Opposed to it is the false. Whatever is true to the reason is right for the will to perform. It then becomes the law to man. God says, "Thou shalt." And man feels, "I ought, because this is duty." Righteousness is doing what one ought. What his reason shows to be true, his soul recognizes, he ought to love and perform. It is like a breastplate. It covers the heart and protects Only as a man does his duty and lives rightly does his heart rest in peace. This is holiness. Neglect of it is wrong doing and sin.

Peace. - A Christian is under obligation to make peace wherever he goes. He 'is never to stir up strife. His feet are not to be swift to run into mischief. "How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace!'

Faith. - This is like a shield. Doubts arise. All things must be tested. Intellectual things must be subjected to the test of reason. No one is under obligation to believe the unreasonable, the false or absurd. No one can believe it. Whoever says he does so believe either misunderstands or speaks lies. Faith is conviction of the reality and truth of a matter. It is confidence. It comes after investigation and proof. It is not depend-"At William street a very fat man ent on a full course of reasoning. Our We know a thing to be true, but cannot tell how we know it to be so. We trust without a fear or doubt in many cases where we have never fully investigated. So our faith in God is firm, not because plans, but knowing some of His truth we have confidence in His wisdom and love and all doubts are broken on this buckler of faith.

Salvation. - A person can know he loves God and his fellow men and be forgotten to keep that highly important conscious of salvation. This consciousness covers him like a helmet and keeps his powers of thinking safe.

The Word.-No substitute can be found for the Bible as the Christian's best weapon of defense. It is truly the sword of God's Spirit.

#### Needs and Wants.

There is great difference between them. The wants of most people are many and complex. Their real needs are much fewer and often very simple. If one wishes for peace of mind and any great measure of success in this world, he must learn to reduce his wants as nearly as possible to necessary things. It is not at all essential that a person be rich, but many people wish to be and make haste to be. The result is anxiety and oftentimes loss of integrity, and failure to reach the real needs of one's being. Happiness never lies in satisfaction of our wants, because these ever become greater as we try to satisfy them. "Contentment is better than wealth" and a quiet spirit which trusts God to supply all our needs and patiently performs the daily task in sweet thankfulness for mercies received is a richer heritage than broad acres and wealth in goods.

Social and literary work must not be neglected. Too largely the various clubs and social organizations in the community engage the attention and occupy the time of our young people. Our com panionship should be largely found among ourselves. Rally around the church. Let this be the center of all activity. Here is ample room for all social and literary activity.

#### Nobility.

True worth is in being, not seeming; In doing each day that goes by Some little good, not in the dreaming Of great things to do by and by. For whatever men say in blindness And spite of the fancies of youth, There's nothing so kingly as kindness And nothing so loyal as truth.

We get back our mete as we measure-We cannot do wrong and feel right, Nor can we give pain and gain pleasure, For justice avenges each slight. The air for the wing of the sparrow The bush for robin and wren, But always the path that is narrow And straight for the children of men

'Tis not in the pages of story The heart of its ills to beguile Though he who makes courtship to glory Gives all that he hath for her smile, For when from her heights he has won her, Alas, it is only to prove That nothing's so sacred as honor And nothing so loyal as love!

Through envy, through malice, through hating, Against the world early and late,

No jot of our courage abating, Our part is to work and to wait. And slight is the sting of his trouble Whose winnings are less than his worth, For he who is honest is noble. Whatever his fortunes or birth

AUSTRIAN STATESMEN EJECTED.

The Rio ing Resumed at the Sitting of the L wer House at Vienna.

VIENNA, Nov. 27.-The disorder in the lower house of the reichrath was so accentuated that a strong detachment of police had to be called in to preserve order.

When the president of the house, Abrahamovics, entered he was greeted with vociferous shouts of "get out." The Leftists rose to their feet in a body, many of the deputies shrieked wildly and an indescribable tumult followed.

During the tumult a Social Democrat, Herr Berner, made a rush for the president and a lively fist fight followed between Berner and the house attendants who attempted to protect the chair.

Thereupon another Social Democrat, Herr Resel, jumped upon the ministerial bench and, hurrying to the presidential hair, seized the papers which were lying on the president's desk and tore them to pieces, while other Social Democrats hastened to Herr Berner's assistance, occupied the tribune and demanded satisfaction for the attendants' pummeling of Herr Berner. President Abrahamovics was compelled to flee.

Subsequently the Social Democrats and other deputies indulged in a free fight and Herr Berner was ejected from the house.

Finally Herr Wollf and 12 other deputies were suspended, some being ejected, upon the return of the president to the house.

It is estimated that a crowd of 10,000, including a very large number of students, assembled on the streets and threatened the government with revolution and Count Badeni, the premier, with the guillotine. An attempt was made to attack Count Badeni's house. The police repeatedly char ed the crowd and several persons were injured.

MRS. NACK DID NOT APPEAR.

State In Thorn Trial Failed to Put Her on the Stand.

NEW YORK, Nov. 27.- Lawyers Howe and Moss, who have diligently defended Martin Thorn, met with a serious and unlooked for obstacle when, after a brief adjournment, District Attorney Youngs informed the court that the people rested their case.

It was generally expected that Mrs. Nack would be put on the stand to 1e- in their use. My back has ached so long iterate her confession, and the lawyers who had been assigned to look after Thorn's interests thought that she would repeat her statement of two

Later District Attorney Youngs said that he was not prepared to say whether Mrs. Nack, who had made such a famons scene in the first trial by her conession, would be produced or not. The case, as far as the district attorney's opinion went, was fully proved without the woman's testimony. Later on, however, one of Mr. Young's advisers said that in case the defense put Martin Th rn on the stand the prosecution would certainly produce Mrs. Nack in rebuttal.

COFFEE SELLING VERY LOW.

Owing to the Fight, It Is Cheaper Than Since Before the War.

NEW YORK, Nov. 27 .- As a result of the war now being waged between the Arbuckle Coffee company and the Woolson Spice company, the sales of coffee during the week now ending have been far in excess of any similar period during the past year. Coffee brokers declared that their sales had been doubled.

The Woolson Spice company, which is controlled by the Havemeyers, is selling Rio No. 7 at 9 cents a pound. Not to be outdone, the Arbuckles have made a reduction in their prices. Coffee is now cheaper than it has been since before the war, say old dealers, and if the fight lasts there is no teiling at what price it will go for. Another reason for the low price is to be found in the enormous quantity of green cof fee now here.

LOVERING'S PUNISHMENT.

The Courtmartial Decided That He Must Receive a Reprimand.

CHICAGO, Nov. 27.—The finding of the courtmartial is that the accused is guilty as charged in the specifications, and "that he be reprimanded by the reviewing authority. The court is thus lenient in view of the good character of the accused as shown in the evidence.

The foregoing is, according to the statement of a man who knows, the exact verdict of the courtmartial which has just completed its labors in the case of Captain Leonard A. Lovering of Ft. Sheridan, charged with brutal treat ment of Private Charles Hammond.

#### Picked Up in the East End by Out Representative.

Our readers are indirectly indebted to Mr. Elmar Stevenson for the following East End items. In discussing some particulars about the new School Board and the E. L. Potters' Union with our representative he incidentally mentioned Liat he had been under the weather with a sore back, but had got over it and hat if our "Scribe" wanted the minute letails of a remarkable case, he ough call on Mrs. Carlina White, of No 125 Railroad street. Hither he wended his vay and gleaned from that lady the foiowing: "I have taken Doan's Kidney l'ilis' said she "and found great relief hat I have forgotten when I was first roubled. I am now 70 years of age and had about given up all hope of ever being helped. I have taken medicines but they did not prove very beneficial my back would ache just the same in the region of the kidneys, and got stiff and lame when sitting long or when lying in bed, sharp twinges of pain and other symptoms convinced me that my kidneys were out of order. Always or the outlook for anything that might bring relief, when I heard Doan's Kidney Pills so highly spoken of I got a box at the W. and W. Pharmacy. After using them for a short time I could plainly notice the good effect they were causing. I continued on them for some time longer and gradually but surely improved. found Doan's Kidney Pills a splendid remedy and advise others to try them feeling confident if they do so they will have no reason to regret it. I know of a number of people here in the East End that swear by Doan's Kidney Pills."

Doan's Kidney Pills are for sale by all dealers. Price 50 cents per box or 6 boxes for \$2.50. Sent by mail on receipt of price by Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S.

It Was a Quiet Little Meeting at Which the Members of the Board of Trade Put Forward the Claims of Wellsville-Work at the Shops-A New Minister.

The movement of the board of trade to provide Wellsville with more manufacturing establishments took another turn last night, but the details are not given out for publication.

Several capitalists from Pittsburg and McKeesport are the parties who want to build here, and it is said they have plenty of money to help the cause along. The board have been confering with them for some time, and it is said that the meeting last night was for the purpose of exchanging propositions. No conclusion was reached, but each side now knows what the other needs, and a definite announcement is expected soon.

#### Hard at Work.

Work on the passenger engines at the shops is being rushed, and the employes are pushing them to completion as rapidly as possible. Everything that can be pressed into service for the purpose of hauling trains is being used.

Railroad men do not believe there will be any considerable falling off in freight traffic after the first of the year. The road depends largely on the coal, iron and sewer pipe trades, and prospects for continued prosperity in these are good.

#### HIS BRIDE WATCHED.

Great Game of Football Put Up by Young Warren Beckwith.

"Oh. I knew he could do it!" was the exclamation of delight that caught the attention of the big crowd out to witness the recent football game between Iowa Wesleyan and the Keokuk medicals when Warren Wallace Beckwith made a 40 yard dash around the left end

of the big medics and scored the first The story seems to have a good touchdown for Iowa Wesleyan. The exclamation was uttered by Mrs. Jessie Lincoln Beckwith, the daughter of ex-Secretary Lincoln, who made a runaway match of it with young Beckwith the other day.

Beckwith was playing the game of his life, inspired by the presence of his young bride. Whether or not the rest still wanted by the police. He became of the team felt the same inspiration it involved in a row with a Liverpool man is certain that the big fellows from Keothe other night, and the stranger was kuk, flushed though they were with recaptured. Johnson, it is understood, cent victories and averaging 20 pounds a man more in weight than the Iowa Wesleyans, went down to defeat. At the end of the game the score stood 48 to 0 in favor of the Iowa Wesleyan, and more than half the points had been made by Beckwith alone.

There was a big crowd of enthusiastic spectators, but none was more excited than the daughter of the ex-secretary of war. During the first part of the game she watched the struggle from a carriage, but as the excitement grew more intense she left the carriage, and, with several girl friends, followed along the side lines the struggling players. Once, when Beckwith was temporarily disabled, she pushed her way in to see how badly hurt he was, and during the entire game she never lost sight of him.

#### THE ACTORS' CHURCH.

Why It Is Called the "Little Church Around the Corner."

The Church of the Transfiguration in New York is known far and wide, both in America and abroad, as the "Little Church Around the Corner." Years ago that admirable man and skillful actor, George Holland, died in New York. His friends, among them Joseph Jefferson, applied to the minister of a certain church in Madison avenue for the performance of the funeral rite, but they were repulsed with the chilling statefrom that church. There was a little church around the corner, the pastor said, where they might do such a thing.

#### BURGLAR'S DEAD PETS.

Wept For His Trained Rats That Were Shot In Trenton Prison.

George Pytzel, a burglar serving a 20 year sentence in the New Jersey state prison, at Trenton, sat in his cell a few nights ago weeping because his pet rats were killed by the keepers.

For years Burglar Pytzel and his pet ats have been an attraction to visitors rats have been an attraction to visitors to the prison. He found the old cookhouse infested with the pests when he was set to work there, but soon he had become complete master of them. He taught them tricks and called them forth from every crevice and hole by a peculiar whistle. They would crawl up his trousers legs, march in single file over his outstretched arms and over his head and return to their hiding places under the floor at his word.

Recently the old cookhouse was demolished, and Head Keeper Moore was convinced that to permit the rats to live meant that they would infest the new building, for he knew they would follow Pytzel. So he decided they should be shot, and the man who loved them was commanded to call them forth for the slaughter. He begged that his especial favorite, whom he had named Kitty, might be spared.

"She is a great comfort to me," he pleaded, "indeed, sir, as much a pet to me as is your pet dog. Please do not kill her, even if you have to kill all the others." But Kitty and the others were shot at sunrise. - New York World.

## PROPOSITIONS WERE EXCHANGED

It Was a Quiet Little Meeting at Which the Members of the Board of Trade Put Forward the Claims of Wellsville-Work at the Shops-A New Minister.

The movement of the board of trade to provide Wellsville with more manufacturing establishments took another turn last night, but the details are not given out for publication.

Several capitalists from Pittsburg and McKeesport are the parties who want to build here, and it is said they have plenty of money to help the cause along. The board have been confering with them for some time, and it is said that the meeting last night was for the purpose of exchanging propositions. No conclusion was reached, but each side now knows what the other needs, and a definite announcement is expected soon.

#### Hard at Work.

Work on the passenger engines at the shops is being rushed, and the employes are pushing them to completion as rapidly as possible. Everything that can be pressed into service for the purpose of hauling trains is being used.

Railroad men do not believe there will be any considerable falling off in freight traffic after the first of the year. The road depends largely on the coal, iron and sewer pipe trades, and prospects for continued prosperity in these are good.

#### A Trial Sermon.

#### HIS BRIDE WATCHED.

Great Game of Football Put Up by Young Warren Beckwith.

"Oh, I knew he could do it!" was the exclamation of delight that caught the attention of the big crowd out to witness the recent football game between will resign their positions in the very Iowa Wesleyan and the Keokuk mednear future to connect themselves with icals when Warren Wallace Beckwith a new mill that will be built in the made a 40 yard dash around the left end of the big medics and scored the first The story seems to have a good touchdown for Iowa Wesleyan. The exfoundation, and is being discussed freely clamation was uttered by Mrs. Jessie Lincoln Beckwith, the daughter of ex-Secretary Lincoln, who made a runaway match of it with young Beckwith the other day.

Beckwith was playing the game of his life, inspired by the presence of his young bride. Whether or not the rest of the team felt the same inspiration it kuk, flushed though they were with recent victories and averaging 20 pounds a man more in weight than the Iowa Wesleyans, went down to defeat. At the end of the game the score stood 48 to 0 in favor of the Iowa Wesleyan, and more than half the points had been made by Beckwith alone.

There was a big crowd of enthusiastic spectators, but none was more excited than the daughter of the ex-secretary of war. During the first part of the game she watched the struggle from a carriage, but as the excitement grew more intense she left the carriage, and, with several girl friends, followed along the side lines the struggling players. Once, when Beckwith was temporarily disabled, she pushed her way in to see how badly hurt he was, and during the entire game she never lost sight of him.

#### THE ACTORS' CHURCH.

Why It Is Called the "Little Church Around the Corner."

The Church of the Transfiguration in New York is known far and wide, both in America and abroad, as the "Little Church Around the Corner." Years ago that admirable man and skillful actor, George Holland, died in New York. His friends, among them Joseph Jefferson, applied to the minister of a certain church in Madison avenue for the performance of the funeral rite, but they were repulsed with the chilling statement that no actors could be buried from that church. There was a little church around the corner, the pastor said, where they might do such a thing. From the "Little Church Around

the Corner" George Holland was buried the next day. The name thus given con-"Little Church Around the Corner" and word -Philadelphia Public Ledger.

its leved rector, the late Dr. G. H. Houghton, have stood high in the affections of theatrical people and their friends for many years. The last sad rites have been performed by Dr. Houghton over the bodies of some of America's greatest actors. Lester Wallack, Dion Boucicault, H. J. Montague and Edwin Booth went to their graves from the "Little Church Around the Corner," and it was from there that James Lewis, long known and loved by New Yorkers, followed them only a little while ago. - New York Tribune.

#### BURGLAR'S DEAD PETS.

Wept For His Trained Rats That Were Shot In Trenton Prison.

George Pytzel, a burglar serving a 20 year sentence in the New Jersey state prison, at Trenton, sat in his cell a few nights ago weeping because his pet rats were killed by the keepers.

For years Burglar Pytzel and his pet rats have been an attraction to visitors to the prison. He found the old cookhouse infested with the pests when he was set to work there, but soon he had become complete master of them. He taught them tricks and called them forth from every crevice and hole by a peculiar whistle. They would crawl up his trousers legs, march in single file over his outstretched arms and over his head and return to their hiding places under the floor at his word.

Recently the old cookhouse was demolished, and Head Keeper Moore was convinced that to permit the rats to live meant that they would infest the new building, for he knew they would follow Pytzel. So he decided they should be shot, and the man who loved them was commanded to call them forth for the slaughter. He begged that his especial favorite, whom he had named Kitty, might be spared.

"She is a great comfort to me," he pleaded, "indeed, sir, as much a pet to me as is your pet dog. Please do not kill her, even if you have to kill all the others." But Kitty and the others were shot at sunrise. - New York World.

#### Train Plunged Through the Station.

The high wind of a recent morning blew over the frame one story passenger station of the Wilmington and Northern Railroad company at Ridgewood, Pa., and it fell across the railroad tracks. 'Joseph Griffiths saw the building on the tracks and walked ahead to warn the engineer. It was still dark, and as he had no lantern the engineer feiled to hear him, although he wave his hat and shouted at the top of his voice. The train plunged through the temptuously has clung to the Church of station, reducing it to splinters. The the Transfiguration ever since, and the front of the engine was slightly dam-

EAST LIVERPOOL, O., SATURDAY, NOV. 27.

From now until President McKinley's message is read there will be some very anxious people in this country.

TELLING a story one day and being compelled to deny it the next is not calculated to inspire respect for a newspaper in any neighborhood.

MR. CHAPMAN'S belief that he will some day be president is additional proof that some of his political friends are laughing at Mr. Chapman.

THERE is a vast amount of money in tled to a position on the records: this country seeking profitable investment, and there is no good reason why some of it should not find its way to East Liverpool.

the Dingley bill there is no real reason for complaint. The bill is all right. It forced prosperity to return and did away with any thought of more bonds. What other could be asked?

THE recommendation of Secretary Alger that the army be increased is not at all popular. If there was any immediate prospect of the country needing more officers and more men, the American people would heartily endorse the movement, but just now they can see no possible excuse for it.

THE people of East Liverpool who a year ago voted the Republican ticket tion of the next postmaster. He will serve them four years, and be paid for the serving. They want a man who will serve them well. It does not always happen that the best man is chosen when the office is given out as a reward for party service, or to please some individual who has done party service and yet desires nothing in the way of position for himself.

#### REMEMBER THE PRIMARIES.

Too much cannot be said of the importance of the Republican city primaries next spring. The loyal Republican is desirous of standing by the nominees of his party, and, to do it without a word of complaint or grumble, he must do what he can to have those nominees the right kind of men. There are any number of good citizens who could fill any municipal office with credit, and these are the men the Republican party should place in nomination. Such a course not only means success at the next election, but it insures the enforcement of law and added respect for the power of the municipality.

## STATE LABOR.

The board of control of Ohio's state institutions will recommend to the next legislature the enactment of a law providing for the employment of the persons who are under their care. Instead of keeping them in idleness at the expense of the state they would have them manufacture as many of those articles now purchased by the commonwealth as is possible. It is not the intention to sell anything produced in this way, but to manufacture what is now purchased at great expense to the tax-

The matter will excite discussion and discussion is just what is needed. If the members of the board can show that the plan so successfully used in New York can be made equally successful in Ohio there is no reason why the state should not derive some of the benefit. The question of competition without injury to free labor can certainly be solved if all sides of the controversy understand thoroughly what is needed.

#### Li Water Never Froze.

The whole economy of nature would undergo a startling change if water never froze. The world's climates would be revolutionized. The icebound polar seas would cease to exercise their chilling influences, and consequently the currents of the ocean might either cease or be turned aside in different direc-

Thus the gulf stream would seek other shores than those of Britain, and the climate there might be subject to the extremes of heat and cold noticeable in other countries of the same latitude. The icebound rivers of the north, notably those of Russia and Siberia, would be open for navigation, and Russia's activity as a sea power and a commercial nation might alter the whole world of commerce.

Canada would become another country altogether. An immense tract of land would be available for cultivating hardy plants, and Greenland might be what its name indicates. The absence of icebergs off the coasts of Newfoundland and Iceland would result in a much warmer climate in those islands, where now the crops often fail.

Ice, too, plays an important part in the economy of nature. Thus, if water never froze, snow, hail and hoar frost would cease. The loosening of soils and and many other now vital effects would be lost. In short, the absence of ice would be on the one hand an incalculable disaster, on the other hand a great boon. - London Globe.

A Great Authority on Evolution.

There is a sketch of "A Great Naturalist," the late Edward Drinker Cope. in The Century. It is written by Henry Catarrh and Stomach Trouble for years. Fairfield Osborn. Professor Osborn says: I called on Doctor Wood, 1273 Euclid His pioneer exploration came early in avenue, last May. The doctor explained the age of Darwinism, when missing links not only in the human ancestry, but in the greater chain of backboned animals, were at the highest premium. Thus he was fortunate in recording the discovery in northwestern New Mexico of by far the oldest quadrupeds known, in finding among these the most venerable monkey, in describing to the world hundreds of links-in fact, whole chains -of descent between the most ancient quadrupeds and what we please to call the higher types, especially the horses, camels, tapirs, dogs and cats. He labored successfully to connect the reptiles with the amphibians, and the latter with the fishes, and was as quick as a flash to detect in the paper of another author the oversight of some long sought link which he had been awaiting Thus in losing him we have lost our ablest and most discerning oritic. No one has made such profuse and overwhelming demonstration of the actual historical working of the laws of evolution, his popular reputation perhaps resting most widely upon his practical and speculative studies in evolution.

#### A Day's Journey.

"A day's journey," as the expression is used in the Scripture, means from 10 to 20 miles. The "Sabbath day's journey," frequently mentioned in the Bible, was 2,000 paces, or about threequarters of a mile. The Jews were forbidden to travel farther than this distance on their Sabbath, but often evaded the prohibition by taking a small quantity of food and burying it in the ground at the required distance from their homes, whereby this spot became technically a habitation, and they could proceed from it another Sabbath day's journey on their way.

## HEALING THE SICK.

A Successful Physician.

The diagnosis of a case of sickness is the first and by far the most important part of a physician's work in bringing back to health and strength his patients, for unless it is correctly made the medicines applied are more likely to do harm than good. It is, therefore, of the highest -J. E. McDonald, John Shrader and importance to those who are sick to secure the services of some one whose superior knowledge will guarantee a diagnosis correct beyond the change of doubt. Such a person is Doctor Wood, of Cleveland, O. He can be consulted at Hotel Lakel until Dec. 4.

Having devoted years exclusively to the study, treatment and cure of CHRONIC DISEASES, treats with remarkable success Diseases of the Eye and Ear, Throat and Lungs, Goiter Neck, Nerve and Brain Affections. Catarrh, Diseases of the HEART, STOMACH, LIVER and KIDNEYS. Painful Affections of the Bladder, with difficult Urination, speedily cured, then pressing down on the tire with Chronic Constipation, Piles, Cancers, Epileptic Fits, Paralysis, Rheumatism, Neuralgia, Asthma, Hay Fever, Erysipelas, Salt Rheum, Dropsy and all Skin and Blood diseases.

Special attention given to Diseases of Women and Children. All Chronic Diseases made a Specialty. Private matters strictly confidential. Over 10,-000 CASES have been treated by the doctor in the last five years, and but one of the vast number to whom he promised relief died. The doctor offers \$500 to anyone who can show a better record than this, and he offers the same to anyone who can excel him in locating diseases. Thousands, who have been under his treatment, will vouch for his skill and success in treating Chronic Diseases.

We would say to the afflicted that his new plan of treatment is a perfect suc-

#### A New Testimonial.

CLEVELAND, O., Jan. 18, 1897. I, the undersigned, was a victim of my case in full detail, without asking any questions. He said he could cure me and proceeded to explain how his medicines would act. I began a course of treatment, and found his remedies had the effect he stated they would, and in six weeks I had gained 8 pounds. I am glad to recommend Doctor Wood to those afflicted with Catarrh, Stomach Trouble or any chronic ailment.

Canadiau Northwest Customs.

On the trails in the Canadian north west it is not customary to disrobe on retiring for the night. A Scotch scientist traveling through Alberta stopped in a rancher's hut and ventured to disregard the local custom, even putting on a nightshirt. In the morning an early visitor asked who was dead. "He's not dead-he's asleep," said the rancher "Then what's he wearin them biled clothes for?" was the reply. "I neve saw a chap laid out in biled clothes afore 'cept he were dead."

#### TIRES THAT LEAK.

The Morgan & Wright single-tube quick-repair tire must be regarded as a distinct improvement in bicycle tire construction. It has the following advantages:

While punctures in it can be repaired with plugs, or semi-liquid injections, as well as in any other single-tube tire, it can be permanently repaired by using the quick-repair strip inside the tire. See cut No. 1.

By injecting M. & W. quick-repair cement through the puncture, and the thumb, as in cut No. 2, the repair

strip inside is picked up by the cement, thus closing the puncture, as in cut No. 3.

The Morgan & Wright single-tube quick-repair tire is guaranteed not porous. This is on account of the way in which it is made. Nearly every rider has heard of tires that "leak like a sieve."

Many tires rot, because water gets into the fabric between the two layers of rubber. The Morgan & Wright fabric is proof against moisture.

Everybody knows how comfortable Morgan & Wright tires are, and yet how seldom they puncture. This is due to the fabric. Ask any bicycle dealer whether

other tires last as long as Morgan & Wright tires. Ask, also, what the Morgan & Wright guarantee means. Morgan & Wright tires are repaired free of charge, at the factory in Chicago or at any of the Morgan & Wright free repair shops, located in the principal cities.

N. B.-When you have a puncture, get right off. Riding a tire flat, when it has a tack or nail in it, may camage it considerably.

A SALTY DOSE OF SIX MONTHS

Mayor Gilbert Sent Him to the Works For Throwing Plates at the Wife of His Bosom-There Was No Alternative In the Way of a Fine-Another Arrest.

Mayor Gilbert had only two cases to dispose of this morning, and as a result the hearing was a short one.

Buck Dobbins, who lives in Second street, was arrested by Chief Johnson last evening on a charge of disorderly conduct preferred by his wife. Dobbins was drunk yesterday, and when he went home he began to abuse his wife by throwing dishes at her, calling her vile names and otherwise abusing her. He was sent to the works for six months.

A man giving the name of Freeman, who said he lived in Franklin street, was fined \$6.60 for being drunk. Freeman was put off the 7:15 train and when the train started he endeavored to catch it. He was about to fall when caught by a bystander. Officer Woods made the arrest.

#### M Water Never Froze.

The whole economy of nature would undergo a startling change if water never froze. 'The world's climates would be revolutionized. The icebound polar seas would cease to exercise their chilling influences, and consequently the currents of the ocean might either cease or be turned aside in different direc-

Thus the gulf stream would seek other shores than those of Britain, and the climate there might be subject to the extremes of heat and cold noticeable in other countries of the same latitude. The icebound rivers of the north, notably those of Russia and Siberia, would be open for navigation, and Russia's activity as a sea power and a commercial nation might alter the whole world of commerce.

Canada would become another country altogether. An immense tract of land would be available for cultivating hardy plants, and Greenland might be what its name indicates. The absence of icebergs off the coasts of Newfoundland and Iceland would result in a much warmer climate in those islands, where now the crops often fail.

Ice, too, plays an important part in the economy of nature. Thus, if water never froze, snow, hail and hoar frost would cease. The loosening of soils and the disintegration of rocks by the frost and many other now vital effects would be lost. In short, the absence of ice would be on the one hand an incalculable disaster, on the other hand a great boon. —London Globe.

He labored successfully to connect the reptiles with the amphibians, and the latter with the fishes, and was as quick as a flash to detect in the paper of another author the oversight of some long sought link which he had been awaiting Thus in losing him we have lost our ablest and most discerning oritic. historical working of the laws of evolution, his popular reputation perhaps resting most widely upon his practical and speculative studies in evolution.

#### A Day's Journey.

"A day's journey," as the expression is used in the Scripture, means from 10 to 20 miles. The "Sabbath day's journey," frequently mentioned in the Bible, was 2,000 paces, or about threequarters of a mile. The Jews were forbidden to travel farther than this distance on their Sabbath, but often evaded the prohibition by taking a small quantity of food and burying it in the ground at the required distance from their lay a board walk on the street, setting of the dedication of the new church will homes, whereby this spot became technically a habitation, and they could proceed from it another Sabbath day's journey on their way.

While punctures in it can be repaired with plugs, or semi-liquid injections, as well as in any other single-tube tire, it can be permanently repaired by using the quick-repair strip inside the tire. See cut No. 1.

By injecting M. & W. quick-repair cement through the puncture, and then pressing down on the tire with the thumb, as in cut No. 2, the repair

strip inside is picked up by the cement, thus closing the puncture, as in cut

The Morgan & Wright single-tube quick-repair tire is guaranteed not porous. This is on account of the way in which it is made. Nearly every rider has heard of tires that "leak like a sieve."

Many tires rot, because water gets into the fabric between the two layers of rubber. The Morgan & Wright fabric is proof against moisture.

Everybody knows how comfortable Morgan & Wright tires are, and yet how seldom they puncture. This is due to the fabric.

Ask any bicycle dealer whether other tires last as long as Morgan & Wright tires. Ask, also, what the Morgan & Wright guarantee means. Morgan & Wright tires are repaired free of charge, at the factory in Chicago or at any of the Morgan & Wright free repair shops, located in the principal cities.

N. B.-When you have a puncture, get right off. Riding a tire flat, when it has a tack or nail in it, may camage it considerably.

THE TALK OF EUROPE.

Brief Recollections Upon Events of Current Interest Across the Ocean.

It is to be hoped that Sir Arthur Channell, who has recently been promoted to be one of the justices of the high court in London, will be a little more certain about his aspirates than was his father, who was one of the most distinguished judges that ever occupied the bench, as far as legal ability was concerned. For many years he presided over the admiralty court. One day a case was being tried before him in connection with the collision of two vessels between Dover and Calais. The name of one of the vessels concerned was the Helen, which the presiding judge insisted on pronouncing as if it were Ellen. At length the counsel for the defense, who was a bit of a humorist, arose and gravely asked his learned brother who was conducting the case for the plaintiff to give the real name of the vessel that had been run down, saying that half the time it was being called the Helen and the rest of the time the Ellen. The learned brother was not slow to respond and replied with equal seriousness that the real name of the vessel was the Helen, but that the H had been lost in the "chops of the Channell."

The Russian government has decided to withdraw the restrictions to which foreign Hebrews who desire to trade in Russia are subjected. Until now every kind of obstacle has been placed in the way of foreign commercial travelers if they happened to belong to the Jewish race, and in nine cases out of every ten they were not allowed to remain in any place, but were expelled by the police as soon as ever they presented their passports. This has had a most injurious effect on industry and commerce. and the grain trade in particular has suffered severely. By the czar's orders foreign Jewish commercial travelers are henceforth to be permitted to travel anywhere in Russia and to remain in the various cities and towns as long as their business requires without any restraint on the part of the police.

The sparrow has found an unexpected champion in the prime minister of France. The farmers have recently been agitating in favor of the extermination of the little bird and succeeded so far that a decree was submitted to Premier Meline for signature, giving orders for the destruction of the bird throughout the country by all available means. Before giving his sanction to the measure the prime minister determined to make an investigation, in the course of which he has received so much information in favor of the birds, especially from the forestry department, that he has not only refused to sign the decree, but has announced that he is about to take steps to promote the increase of the species in consequence of its usefulness. It seems that the harm that it does to the crops is more than counterbalanced by the benefits which it confers in destroy ing the caterpillars, worms and other insects that are so detrimental to trees.

The situation at Lisbon continues so critical that the royal yacht is lying, provisioned and with banked fires, in the Tagus, a short distance from the shore, ready for any emergency that may arise. That shows how serious are the apprehensions of the king and queen of some revolutionary outrage which may compel them to seek refuge with their children on board the yacht. It is likewise asserted in court circles that the majority of the royal valuables, such as plate and jewels, are kept on board this yacht, which is manned by officers and sailors on whom the king can rely absolutely. The precaution is wise, since the first thing that a revolutionary mob is in the habit of doing is to sack the

In Vienna the management of the Imperial Opera House, which is a crown and not a joint stock enterprise, has introduced some new rules of a rather exceptional and drastic character. ## JOSEPH LADUE,

the new Bonanza King of the Klondyke Gold Regions, gives the facts. His book reads like "The Arabian Nights," BUT Joseph Ladue KNOWS whereof he writes. He was the first man on the spot when the first gold was discovered last August, 1896. He located one rich claim and immediately purchased welve others at a low price before their value was known. He has refused \$100,000 for any ONE of these claims, as they are rich with virgin gold nuggets, beyond the dream of avarice. Joseph Ladue then

## Established Dawson City

at the mouth of the Klondyke and Yukon Rivers, by erecting the first house in the region in September, one month after the gold was first discovered. He bought 178 acres from the government on the city site where his town lots 150x50 are now selling for \$5,000 each.

Mr. Ladue was fortunate enough to be successful in his trading post investments to have on hand ample capital to carry out his plans, and there is no man living who is better posted on Alaska and the great North West Territories than Mr. Joseph Ladue. He has just returned from that country to his old home in Schuler Falls, N. Y., where he passed a large portion of his boyhood and early manhood. Mr. Ladue left his home nearly twenty years ago to seek his fortune in the west going first to the Black Hills, where he was successful in gold mining, thence to Arizona and the Pacific coast and finally located in Alaska and the northwest, where he has covered almost the entire country since 1882. Mr. Ladue is a typical pioneer: strong, hardy and resolute—a man of iron as one must needs be to go through the hardships he has and come out with a constitution unbroken and unimpared at about the age of 43. Mr. Ladue has not only worked his muscles to good advantage to himself with the result of an abundance of the world's goods, far beyond the dreams of men, but he has evidently all this time been closely observing the conditions of that strange country-the Yukon Valley-which has so suddenly become one of the great centers upon which human interest throughout the world is focussed.

When the wonderful stories began to come down from the Yukon country it was naturally concluded that it was at least half exaggeration. That any such amount of gold could be taken in so short a time from a country like that under the most most unfavorable conditions was held to be incredible. But when the great bags of virgin gold began to be poured out upon mint counters in San Francisco under the eyes of the whole world (for modern journalism does this, annihilating time and space) people began to wonder and the wonder grew day by day as the real facts were disclosed, and now people who are well informed as to the facts declare that half the truth has not been told of the Our Type. golden treasures of the Yukon Valley.

As we have already said, there is no man today alive who knows more about this wonderful country than does Mr. Ladue. What makes his talk of it specially interesting and reliable is the fact that his knowledge of it is practical. It has not been gained from hearsay nor from desultory visits made, now and then at certain favorable seasons of the year, but from steady living there through the long summer days and the long winter nights, year in and year out for 15 years, where he now owns the best mining claims on the Klondyke and

THE TALK OF EUROPE.

Brief Recollections Upon Events of Current Interest Across the Ocean.

It is to be hoped that Sir Arthur moted to be one of the justices of the high court in London, will be a little more certain about his aspirates than was his father, who was one of the most distinguished judges that ever occupied the bench, as far as legal ability was concerned. For many years he presided over the admiralty court. One day a case was being tried before him in connection with the collision of two vessels between Dover and Calais. The name of one of the vessels concerned was the Helen, which the presiding judge insisted on pronouncing as if it were Ellen. At length the counsel for the defense, who was a bit of a humorist, arose and gravely asked his learned brother who was conducting the case for the plaintiff to give the real name of the vessel that had been run down, saying that half the time it was being called the Helen and the rest of the time the Ellen. The learned brother was not slow to respond and replied with equal seriousness that the real name of the vessel was the Helen, but that the H had been lost in the "chops of the Channell."

The Russian government has decided to withdraw the restrictions to which foreign Hebrews who desire to trade in Russia are subjected. Until now every kind of obstacle has been placed in the way of foreign commercial travelers if they happened to belong to the Jewish race, and in nine cases out of every ten they were not allowed to remain in any place, but were expelled by the police as soon as ever they presented their passports. This has had a most injurious effect on industry and commerce, and the grain trade in particular has suffered severely. By the czar's orders foreign Jewish commercial travelers are henceforth to be permitted to travel anywhere in Russia and to remain in the various cities and towns as long as their business requires without any restraint on the part of the police.

The sparrow has found an unexpect ed champion in the prime minister of France. The farmers have recently been agitating in favor of the extermination of the little bird and succeeded so far that a decree was submitted to Premier Meline for signature, giving orders for the destruction of the bird throughout the country by all available means. Before giving his sanction to the measure the prime minister determined to make an investigation, in the course of which he has received so much information in favor of the birds, especially from the forestry department, that he has not only refused to sign the decree, but has announced that he is about to take steps to promote the increase of the species in consequence of its usefulness. It seems that the harm that it does to the crops is more than counterbalanced by ntely. It will pay you to do so, and then the benefits which it confers in destroying the caterpillars, worms and other insects that are so detrimental to trees.

> The situation at Lisbon continues so critical that the royal yacht is lying, provisioned and with banked fires, in the Tagus, a short distance from the shore, ready for any emergency that may arise. That shows how serious are the apprehensions of the king and queen of some revolutionary outrage which may compel them to seek refuge with their children on board the yacht. It is likewise asserted in court circles that the majority of the royal valuables, such as plate and jewels, are kept on board this yacht, which is manned by officers and sailors on whom the king can rely absolutely. The precaution is wise, since the first thing that a revolutionary mob is in the habit of doing is to sack the royal palaces.

In Vienna the management of the Imperial Opera House, which is a crown and not a joint stock enterprise, has introduced some new rules of a rather exceptional and drastic character. Henceforth no person is to be allowed to enter the house after the overture is finished until the close of the first act. When a piece of Wagner's is played, this restriction is to take effect at the beginning of the overture. The claque, too, has been entirely suppressed. - New York Tribune.

Sight and Smell Shot Away.

Herbert J. Fish of Valparaiso, Ind. recently put a 38 caliber bullet through his brain in a fit of insanity and is still alive and getting well. The bullet passed through the right and left anterior hemispheres of the brain, lodging finally in the posterior bone wall of the left eye socket. In its course the ball destroyed a large amount of brain matter, destroyed the sense of smell and cut the optic nerve of each eye. The physicians think his mental condition will be weakened, but aside from that he will be all right. At times he is rational, but does not believe that he shot himself.—Cincinnati Commercial Tribuna

The Land of Golden Nuggets.

## JOSEPH LADUE,

the new Bonanza King of the Klondyke Gold Regions, gives the facts. His book reads like "The Arabian Nights," BUT Joseph Ladue KNOWS whereof he writes. He was the first man on the spot when the first gold was discovered last August, 1896. He located one rich claim and immediately purchased welve others at a low price before their value was known. He has refused \$100,000 for any ONE of these claims, as they are rich with virgin gold nuggets, beyond the dream of avarice. Joseph Ladue then

## Established Dawson City

at the mouth of the Klondyke and Yukon Rivers, by erecting the first house in the region in September, one month after the gold was first discovered. He bought 178 acres from the government on the city site where his town lots 150x50 are now selling for \$5,000 each.

Mr. Ladue was fortunate enough to be successful in his trading post investments to have on hand ample capital to carry out his plans, and there is no man living who is better posted on Alaska and the great North West Territories than Mr. Joseph Ladue. He has just returned from that country to his old home in Schuler Falls, N. Y., where he passed a large portion of his boyhood and early manhood. Mr. Ladue left his home nearly twenty years ago to seek his fortune in the west going first to the Black Hills, where he was successful in gold mining, thence to Arizona and the Pacific coast and finally located in Alaska and the northwest, where he has covered almost the entire country since 1882. Mr. Ladue is a typical pioneer: strong, hardy and resolute—a man of iron as one must needs be to go through the hardships he has and come out with a constitution unbroken and unimpared at about the age of 43. Mr. Ladue has not only worked his muscles to good advantage to himself with the result of an abundance of the world's goods, far beyond the dreams of men, but he has evidently all this time been closely observing the conditions of that strange country-the Yukon Valley-which has so suddenly become one of the great centers upon which human interest throughout the world is focussed.

When the wonderful stories began to come down from the Yukon country it was naturally concluded that it was at least half exaggeration. That any such amount of gold could be taken in so short a time from a country like that under the most most unfavorable conditions was held to be incredible. But when the great bags of virgin gold began to be poured out upon mint counters in San Francisco under the eyes of the whole world (for modern journalism does this, annihilating time and space) people began to wonder and the wonder grew day by day as the real facts were disclosed, and now people who are well informed as to the facts declare that half the truth has not been told of the golden treasures of the Yukon Valley.

As we have already said, there is no man today alive who knows more about this wonderful country than does Mr. Ladue. What makes his talk of it specially interesting and reliable is the fact that his knowledge of it is practical. It has not been gained from hearsay nor from desultory visits made, now and then at certain favorable seasons of the year, but from steady living there through the long summer days and the long winter nights, year in and year out for 15 years, where he now owns the best mining claims on the Klondyke and its tributaries.

WAS NOT PURCHASED TO TRADE

He Will Be Found on First Base When Louisville Opens the Season-How Mo-Mercer Is a Good Story.

There is little doubt but that George Carey will commence the season at first base with the Louisville team, as he was not drafted for a trade as was announced a short time ago. His record in the Atlantic League is as follows: One hundred and twenty-seven games, 1,311 putouts, 51 assists, 20 errors, 1,382 total chances, with an average of .986. In speaking of him the Louisville correspondent to Sporting Life says:

"I have it from good authority that Manager Clark has made up his mind that Carey will at least start the season as the club's regular first baseman, considence being felt in his entire ability to to acquit himself creditably as a big league guardian of the bag. Both Kansas City and Minneapolis are making a strong bid for Werden, and he will be allowed to go to either of these clubs with a written understanding that in ease Carey does not hold up his end satisfactorily the club to whom Werden is released agrees to return Perry and accept Carey in his place. This appears to be a wise move and insures at least first base being as well cared for in '98 as it was during the past season."

In the notes comment is made as follows:

"Louisville fans are dubious about George Carey and question President Pulliam's wisdom in drafting him. They will endorse it, however, when they see Carey in action."

President Pullman, of the Louisville team, is well pleased with Toadix, and

"As good as Carey was when he played with Baltimore, he is a far better man now, just good enough for Hanlon to be anxious to get him back again. Hanlon was doing business for him with the Reading club, but we stepped in ahead and landed the man. When he farmed out Carey two years ago, Hanlon said at the time that he needed only a little more experience against good pitchers to become a first class batsman. and the Atlantic association averages seem to bear the idea out. Carey was fourth among 109 men, with .361, but as he played more games than Wagner, 'Ducky' Holmes and Ward, who led him, he is really entitled to the batting

From Mobile cames the following interesting item :

"Nearely six years ago a young man wrote to the local club from East Liverpool, O., asking for a trial, and offered te pay his own expenses all the way down here, which indicated confidence, as it is a pretty expensive trip. He said terms could be discussed afterwards if his work suited. Manager Kelly liked the tone of the letter and was in favor of giving the boy a trial as it required no great liberality, the player having stipulated that he was to get nothing if his work proved unsatisfactory. Sam Mills, at that time on the local infield, is a citizen of East Liverpool so he was asked about the youngster. Mills said he wouldn't do for the company and nis opinion prevailed. Thus did the Mobile club turn down Mercer, now the star of the Washington club."

Logging Railroads.

reliable.

Time was when the logs were drawn ever roads of snow and ice on the great rude sledges to the banks of some river, drawn out on the ice and left until the springtime, when they would be floated down stream to the mills. In some places the system is still in vogue, but in large measure all this has been changed. Logging railroads have been built into the forests, enabling the owners of pine lands to reach forests far from any stream. Spurs from the main branch of the road are built out like the fingers on an enormous hand clutching at the defenseless pines. After a tortuous passage through the paths of the woods the log is loaded upon the skidway-an incline leading down to the railway track. The skids are long, tough poles of tamarack or some hard wood, placed about 20 feet apart.

The logs easily roll down on these skids and are drawn by horses up on the short, wide freight cars, and as fast as one car is loaded another takes its place, until a train of perhaps 30 cars is made up. The road is a very rough one, and the trains are supplied with the best of airbrakes, for the grades are steep, and great care must be exercised or the trains will break in two and disaster and possibly loss of life will follow if a part of one of the trains breaks away and starts down the grade. "Mountain climbers," the powerful engines in use in mining regions, are a part of the equipment of a logging railroad .- "The Story of a Pine Board," by W. S. Harwood, in St. Nicholas.

How to Take a Bath.

"I cannot understand why it is," says a physician "that when I order a cold tub bath for my patients, the temperature to be at \$5 or 70 degrees, they never can understand how they are to do it. 'I suppose I shall let the water stand overnight, says one. But it is uot necessary to let the water stand overnight. We are living under civilized conditions, and the very simple plan of turning on the hot water faucet for a few minutes will moderate the water to exactly the proper temperature. Some people do not understand taking a cold bath anyway. I don't wonder they take cold. To bathe properly, when the water is in the tub turn down the nightclothes and bathe the face and neck. Then, stepping into the tub, kneel on one knee and with the sponge throw the water first over one shoulder and then over the other down the spine. That causes the reaction which makes the body warm. Quickly sponge over the rest of the body, make a few motions forward in the water, as if swimming, and then jump out into the bedroom slippers. It need not take more than a moment. Such a bath is very beneficial to many thin blooded people. -New York Times.

#### TESTING THE WIND.

PROFESSOR NIPHER'S RIDES ON TOP OF A FREIGHT CAR.

Measuring the Air Currents-Method of a St. Louis Scientist to Procure Information For the United States Government About Atmospheric Pressure.

A learned professor rode on top of a Wabash freight car just like a plain, ordinary, unlettered brakeman or a hobo from St. Louis to Montgomery, Mo., the other day. He returned the same way the next day.

The man of science was Professor F. E. Nipher of Washington university. He was not beating his way, but he adopted that unpleasant and hazardous method of travel for scientific purposes.

For a long time Professor Nipher has een experimenting with air disks to ascertain the exact power of wind pressure. To verify these experiments he wanted a good, strong wind, varying from 10 to 40 miles an hour. Professors, like some other people, cannot always "raise the wind" just when they most lesire to, so Professor Nipher resorted to a freight train to obtain a supply of artificial wind instead of waiting for the real thing.

The start was made on a Saturday morning from the Wabash yards. The professor had his apparatus with him, and it excited the train crew and the loungers at rural way stations to much wonderment.

There was "an eager and a nipping air," and passengers on street cars turned up their overcoat collars to keep warm. Out in the open country, with no closely built houses to obstruct the wind, and on top of a rapidly moving car, the temperature was many degrees colder. There was no resorting to artificial means to keep warm either, not even to the extent of impounding the hands in the pockets. The professor had to watch his apparatus and hang on tight to keep from being thrown off the

Professor Nipher is the inventor of a pressure collector consisting of a small disk made of perforated brass gauze. The air collected is conveyed through a pipe to a tube partly filled with water. The rise and fall of the water indicate

the amount of pressure. "When a strong wind blows directly against one side of a house," said Professor Nipher, "the pressure is increased on that side, but is diminished on the other side. Seeking to escape currents of air go around the sides, sweeping away the normal air pressure and diminishing the pressure. This is why if a window is blown in on the side where the wind is blowing the windows and walls of the other sides will fall, although the walls on the windward side may stand. There is no air pressure to support the lee wall. We saw this in the tornado, but it does not require a tornado or cyclone to produce this effect. A strong, straight wind will do the

"I propose to equip some large building with these disks. When a wind is blowing on one side, the pressure will be indicated on that side, and the diminished pressure will be shown by the water tubes on the other sides. Then by a flashlight photograph of all the tubes taken simultaneously the exact pressure and exhaust in the several parts of the building will be ascertained. This is the information desired by the government engineers to ascertain the exact influence of wind pressure."

The apparatus taken by Professor Nipher on his treight train trip consisted

of a poard carried on pivots between two disks and surmounted by a wind vane. A needle on the board registered on the lower disk the angle at which the board was carried by the wind. The board's position was changed from time to time to test the effect of unequal distribution of the surface of resistance. The experiments were made merely to verify tests previously made with the

air disks and were entirely satisfactory.

The trip to Montgomery occupied the whole day. There were long and tedious waits on switches, but the professor got just what he wanted. On up grades Pittsburgh the train made from 6 to 10 miles an hour, on level stretches a 20 mile velocity was attained, and double that on some down grades, so that an opportunity was afforded of making the tests in all kinds of air currents in one day. After a night's rest at Montgomery Professor Nipher continued his observations on the return trip.-St. Louis Post-Dispatch.

#### SUBSTITUTE FOR RUBBER.

New Substance Is Called Perchoid-Will Cost About Five or Six Cents a Pound.

It was recently announced in Denver that the Right Rev. Dean H Martyn Hart of St. John's cathedral in that city had perfected an invention which is calculated to revolutionize the rubber trade. Napier Ford discovered a method of oxidizing oils, and when he died in London two years ago he handed his invention to Charles Griest, who made some improvements in it and then turned it over to Dean Hart.

The dean, who is an expert chemist, worked on it for months and finally made it valuable commercially. The business end of the process was turned over to Dr. John Gower, who went to London and organized a company for its manufacture. The new substance is called perchoid. It will cost only about 5 or 6 cents a pound.

WAS NOT PURCHASED TO TRADE

He Will Be Found on First Base When Louisville Opens the Season-How Mobile Missed an Opportunity to Own Mercer Is a Good Story.

There is little doubt but that George Carey will commence the season at first base with the Louisville team, as he was not drafted for a trade as was announced a short time ago. His record in the Atlantic League is as follows: One hundred and twenty-seven games. 1,311 putouts, 51 assists, 20 errors, 1,382 total chances, with an average of .986. In speaking of him the Louisville correspondent to Sporting Life says:

"I have it from good authority that Manager Clark has made up his mind that Carey will at least start the season as the club's regular first baseman, considence being felt in his entire ability to to acquit himself creditably as a big league guardian of the bag. Both Kansas City and Minneapolis are making a strong bid for Werden, and he will be allowed to go to either of these clubs with a written understanding that in ease Carey does not hold up his end satisfactorily the club to whom Werden is released agrees to return Perry and accept Carey in his place. This appears to be a wise move and insures at least first base being as well cared for in '98 as it was during the past season."

In the notes comment is made as fol-

"Louisville fans are dubious about George Carey and question President Pulliam's wisdom in drafting him. They will endorse it, however, when they see Carey in action."

President Pullman, of the Louisville team, is well pleased with Toadix, and mavs:

"As good as Carey was when he played with Baltimore, he is a far better man now, just good enough for Hanlon to be anxious to get him back again. Hanlon was doing business for him with the Reading club, but we stepped in ahead and landed the man. When he farmed out Carey two years ago, Hanlon said at the time that he needed only a little more experience against good pitchers to become a first class batsman, and the Atlantic association averages seem to bear the idea out. Carey was fourth among 109 men, with .361, but as he played more games than Wagner, 'Ducky' Holmes and Ward, who led him, he is really entitled to the batting lead."

From Mobile cames the following interesting item:

"Nearely six years ago a young man wrote to the local club from East Liverpool, O., asking for a trial, and offered to pay his own expenses all the way down here, which indicated confidence, as it is a pretty expensive trip. He said terms could be discussed afterwards if his work suited. Manager Kelly liked the tone of the letter and was in favor of giving the boy a trial as it required no great liberality, the player having stipulated that he was to get nothing if his work proved unsatisfactory. Sam Mills, at that time on the local infield, is a citizen of East Liverpool so he was asked about the youngster. Mills said he wouldn't do for the company and nis epinion prevailed. Thus did the Mobile club turn down Mercer, now the star of the Washington club."

Rogers, O., August 25, 1896.

Mr. B. L. Teel, Agent People's Cyclopedia:

Dear Sir: I have examined with care The People's Cyclopedia, published by Eaton & Mains, and consider it superior to all other cyclopedias. I have a modern cyclopedia of forty volumes which I consider inferior to the "People's" in every respect. I know of no cyclopedia so clear, concise and complete, and one which so thoroughly recommends itself. It gives me pleasure to speak a word in its behalf. I am yours respectfully.

Louis T. Farr, Attorney and Counselor at Law.

East Liverpool, Ohio, November 24, 1897. Having used the People's Cyclopedia, published by Eaton & Mains, for several years, I can say, that it is an excellent reference work. The articles are concise and thoroughly Very respectfully. reliable.

R. E. RAYMAN, Superintendent of Public Instruction.

Lisbon, Ohio, May 4, 1897. I have examined the People's Cyclopedia, published by Faton & Mains, and find it clear and concise, yet comprehensive, also up to date in its articles. It covers a large field for a work so inexpensive. I heartily recommend the work to teachers and all who want a ready-reference Cyclopedia. I do not know of any similar work for the money that will furnish an equal amount of reliable information.

#### Logging Railroads.

Time was when the logs were drawn ever roads of snow and ice on the great rude sledges to the banks of some river, drawn out on the ice and left until the springtime, when they would be floated down stream to the mills. In some places the system is still in vogue, but in large measure all this has been changed. Logging railroads have been built into the forests, enabling the owners of pine lands to reach forests far from any stream. Spurs from the main branch of the road are built out like the fingers on an enormous hand clutching at the defenseless pines. After a tortuous passage through the paths of the woods the log is loaded upon the skidway-an incline leading down to the railway track. The skids are long, tough poles of tamarack or some hard wood, placed about 20 feet apart.

The logs easily roll down on these skids and are drawn by horses up on the short, wide freight cars, and as last as one car is loaded another takes its place, until a train of perhaps 30 cars is made up. The road is a very rough one, and the trains are supplied with the best of airbrakes, for the grades are steep, and great care must be exercised or the trains will break in two and disaster and possibly loss of life will follow if a part of one of the trains breaks away and starts down the grade. "Mountain climbers," the powerful engines in use in mining regions, are a part of the equipment of a logging railroad .- "The Story of a Pine Board," by W. S. Harwood, in St. Nicholas.

How to Take a Bath. "I cannot understand why it is," says a physician, "that when I order a cold tub bath for my patients, the temperature to be at \$5 or 70 degrees, they never can understand how they are to do it. 'I suppose I shall let the water stand overnight, says one. But it is uot necessary to let the water stand overnight. We are living under civilized conditions, and the very simple plan of turning on the hot water faucet for a few minutes will moderate the water to exactly the proper temperature. Some people do not understand taking a cold bath anyway. I don't wonder they take cold. To bathe properly, when the water is in the tub turn down the nightclothes and bathe the face and neck. Then, stepping into the tub, kneel on one knee and with the sponge throw vicinity who desire information that the water first over one shoulder and then over the other down the spine. That causes the reaction which makes the body warm. Quickly sponge over the rest of the body, make a few motions forward in the water, as if swimming, and then jump out into the bedroom slippers. It need not take more than a moment. Such a bath is very beneficial to many thin blooded people. -New York Times.

#### TESTING THE WIND.

PROFESSOR NIPHER'S RIDES ON TOP OF A FREIGHT CAR.

Measuring the Air Currents-Method of a St. Louis Scientist to Procure Information For the United States Government About Atmospheric Pressure.

A learned professor rode on top of a Wabash freight car just like a plain, ordinary, unlettered brakeman or a hobo from St. Louis to Montgomery, Mo., the other day. He returned the same way the next day.

The man of science was Professor F. E. Nipher of Washington university. He was not beating his way, but he adopted that unpleasant and hazardous method of travel for scientific purposes.

For a long time Professor Nipher has been experimenting with air disks to ascertain the exact power of wind pressure. To verify these experiments he wanted a good, strong wind, varying from 10 to 40 miles an hour. Professors, like some other people, cannot always "raise the wind" just when they most lesire to, so Professor Nipher resorted to a freight train to obtain a supply of artificial wind instead of waiting for

the real thing. The start was made on a Saturday morning from the Wabash yards. The professor had his apparatus with him, and it excited the train crew and the loungers at rural way stations to much

wonderment. There was "an eager and a nipping air," and passengers on street cars turued up their overcoat collars to keep warm. Out in the open country, with no closely built houses to obstruct the wind, and on top of a rapidly moving car, the temperature was many degrees colder. There was no resorting to artificial means to keep warm either, not even to the extent of impounding the hands in the pockets. The professor had to watch his apparatus and hang on tight to keep from being thrown off the

Professor Nipher is the inventor of a pressure collector consisting of a small disk made of perforated brass gauze. The air collected is conveyed through a pipe to a tube partly filled with water. The rise and fall of the water indicate

the amount of pressure. "When a strong wind blows directly against one side of a house," said Professor Nipher, "the pressure is increased on that side, but is diminished on the other side. Seeking to escape currents of air go around the sides, sweeping away the normal air pressure and diminishing the pressure. This is why if a window is blown in on the side where the wind is blowing the windows and walls of the other sides will fall, although the walls on the windward side may stand. There is no air pressure to support the lee wall. We saw this in the tornado, but it does not require a tornado or cyclone to produce this effect. A strong, straight wind will do the

same thing. "I propose to equip some large building with these disks. When a wind is blowing on one side, the pressure will be indicated on that side, and the diminished pressure will be shown by the water tubes on the other sides. Then by a flashlight photograph of all the tubes taken simultaneously the exact pressure and exhaust in the several parts of the building will be ascertained. This is the information desired by the government engineers to ascertain the exact influence of wind pressure.

The apparatus taken by Professor Nipher on his freight train trip consisted

of a poard carried on pivots between two disks and surmounted by a wind vane. A needle on the board registered on the lower disk the angle at which the board was carried by the wind. The board's position was changed from time to time to test the effect of unequal distribution of the surface of resistance. The experiments were made merely to verify tests previously made with the air disks and were entirely satisfactory.

The trip to Montgomery occupied the whole day. There were long and tedious waits on switches, but the professor get just what he wanted. On up grades the train made from 6 to 10 miles an hour, on level stretches a 20 mile velocity was attained, and double that on some down grades, so that an opportunity was afforded of making the tests in all kinds of air currents in one day. After a night's rest at Montgomery Professor Nipher continued his observations on the return trip.-St. Louis Post-Dispatch.

#### SUBSTITUTE FOR RUBBER.

New Substance Is Called Perchoid-Will Cost About Five or Six Cents a Pound.

It was recently announced in Denver that the Right Rev. Dean H Martyn Hart of St. John's cathedral in that city had perfected an invention which is calculated to revolutionize the rubber trade. Napier Ford discovered a method of oxidizing oils, and when he died in London two years ago he handed his invention to Charles Griest, who made some improvements in it and then turned it over to Dean Hart.

The dean, who is an expert chemist, worked on it for months and finally made it valuable commercially. The business end of the process was turned over to Dr. John Gower, who went to London and organized a company for its manufacture. The new substance is called perchoid. It will cost only about 5 or 6 cents a pound.

#### LOCAL BREVITIES.

Born to Mr. and Mrs. Parke Orr, Fourth street—a daughter.

The Elks are today moving to their new quarters in the Knowles block.

Miss Kate Boyce last evening pleasantly entertained friends at her home in Forest street.

Freight busines was not as brisk this morning as it might have been. Inbound freight is heavy.

Twelve baskets of ware were shipped to Allegheny this morning. It was the first shipment of the week. A large shipment of machinery was

sent to the Sebring pottery in East End

today. There is yet one shipment to be made. The case of H. M. Hughes against Samuel Strickline was before the mayor

this afternoon at 2 o'clock, but was postponed indefinitely. The cool weather of the last few nights has caused several bums to apply for a night's lodging at the jail. Last night

two were given shelter. Mrs. George Buxton, who was very ill for several months, is very much improved, and there is now no thought

but that she will soon be well. Miss Mary Vodrey entertained about 25 members of her Sunday school class at her home in Robinson street yesterday. An excellent musical and literary program was rendered, and all spent the time delightfully.

Superintendent Rayman, in company with Miss Updegraff and Miss Fransisco, of the high school, left this morning for Steubenville, where they attended the closing session of the Eastern Ohio Teachers' association.

The West Market street sewer yesterday became clogged and a force of men are today removing the obstruction. The sewer has not the necessary fall, and causes more trouble than any other sewer in the city.

Cleveland and Pittsburg road with can save them is the divine method. offices in Bellaire, was in the city today the guest of Freight Agent T.J. Thomas. There was no special significance attached to his visit.

D. C. Simmers left this afternoon for Uhrichsville, where he was called by the death of his aunt, Miss Deliah Cunning, who died at her home in Tuscarawas yesterday morning. The funeral will take place Monday morning.

A horse owned by Calvin Croft ran off yesterday afternoon, near Spring Grove, and badly damaged the buggy. The animal was being driven by Will Croft. A small child, also in the buggy, was thrown out, but escaped injury.

Supervisor Hickey and a force of workmen today finished the work of cleaning the sidings of all the dirt that has accumulated there during the past year. Between some of the tracks the dirt was rail high. The cleaning was an improvement that was much needed.

George F. Brunt now holds the record of the city in live bird shooting. At the private match held at Rock Spring, Thursday afternoon, he succeeded in killing 29 out of a possible 30, missing his first bird. This a record never equalled here, and will probably stand for a good many years.

The social held last evening at the Grand Army was well attended. D. B. Mackey gave a very pleasing address on the "American Soldier" and speeches were made by D. J. Smith, A. J. L. Kerr and Mrs. M. E. Calhoun. Solos were rendered by Colin McLane and Fred Croxall, and were heartily enjoyed. Lunch was served.

The water works trustees met last evening and discussed the situation in regard to their trouble with the light company. Judge P. M. Smith was present, and made a statement in behalf of the light company asking a lower water rate. He was given no definite answer, and the request will be taken under consideration at the next meeting of the board.

Mrs. Ernest Gamble, the basso who recently gave a recital here, sings tonight (Saturday) in the Metropolitan Opera House, New York, with Anton Seidl's orchestra. He is also engaged as solo bass in Trinity church, Twenty-sixth and Broadway, one of the largest and most beautiful churches in the city, the one attended by the Astor family. Mr. Gamble will resume his recital tour June 1.

#### CHRISTIAN ENDEAVOR.

Topic For the Week Beginning Nov. 28. Comment by Rev. S. H. Doyle.

Topic.-"How can we consecrate ourselves to the temperance and other reforms?"-Luke i, 5-17. (International Temperance Sunday.)

The Scripture quoted in the reference tells the story of the visit of the angel to Zacharias, to whom he foretold the birth of John the Baptist, who was to be great in the sight of the Lord and drink neither wine nor strong drink, but to be filled with the Holy Ghost. John was a total abstainer. He was also a great reformer and may appropriately introduce us to the study of temperance

That there is need of consecration to temperance and other reforms is apparent to all. The indifference of Christian people to the one power that is destroying more human beings both for time and for eternity is appalling. When we know that millions of dollars are spent annually, thousands of homes are ruined, thousands of persons go down to drunkards' graves; that the souls of men are lost and their bodies brutalized and wives are murdered and children starved, all because of the curse of drink, it would seem that the whole thurch would be in arms against it. Yet It is not. The Christian world largely sleeps while the temporal lives of millions are ruined and their souls damned for eternity.

What can we do in this great reform? First.—Practice temperance. Every Christian Endeavorer should be a total abstainer. Our influence will be against

temperance unless we practice it. Second. - Educate public opinion against intemperance. When the people want intemperance and the saloon to go, they will go. They will not go before. It is not so much the laws that need to be reformed as the people. Reform the laws and not the people, and laws become a dead letter. Reform the people, and they will demand that the laws be reformed and enforced. The temperance campaign must be a campaign of education, and not a campaign of strifes, contentions and disputations among those who are arrayed against this great evil. And what a boundless opportunity the Christian Endeavor organization has for educating the youth of the world upon this subject! Let us teach young and old that drink is unnecessary, that it is not beneficial to body, mind or soul and that it is disastrous and ruinous both for time and eternity.

Third.—Hold up Christ and the cross to the world. The cross of Christ is the only remedy that can reach down into the depths of this foul pool of iniquity. Human methods of reform may ameliorate the condition of men and are not to J. J. McCormick, general agent of the be despised, but the only method that Fill a man with Christ, and there will be no room for strong drink.

#### A Slice of Human Nature.

Why is it that when one or two rich but stingy members belong to a church all the rest are prone to measure their obligations by the standard set by their richer brethren? And why is it that when a poor washerwoman, for instance, sets the example of sacrificing until it hurts and pinches, her more favored brethren do not think of making her giving the standard by which to measure their obligations? The only answer we can give is that nature in most cases is still stronger than grace. To be liberal toward oneself is the first lesson we have learned, to be liberal toward God is the second lesson, and to learn it we must unlearn what our first instructor, the old Adam, taught us .-Lutheran.

#### They Cannot Understand.

Persons who can most readily understand how they might have become as intelligent, cultured and noble as others who have been born in loftier stations rived at Nikki. are often totally unable to understand how, had they been born in the slums, they could have become like the vice and degradation by which they would have been surrounded. They can understand how exaltation might have helped them upward, but they cannot understand how degradation would have helped them downward. -Lutheran Ob-

#### The Christian's Is the Eternal Life.

It is perfected by the sufferings and struggles of the present. All things unless some unforseen delay occurs she work together for its good. The fire purifies it, the battle gives its powers exercise, the darkness makes it to grow the more rapidly and persecution extends its achievements. Living for Christ is the one thing worth living for. -Christian Statesman.

#### Being Appreciated.

It is pleasant to be appreciated. Persons work better when they know that their efforts command approval. Nothing is lost by kindly words of interest and recognition. Flattery is offensive, but appreciation of another's kindness and service is always acceptable. - Presbyterian.

The First Goldenrod. I thought not of the added beauty
To the glow of the golden noon,
But this was the greeting I gave thee"Has the goldenrod come so soon?"

Twas the ghost of the flying springtime And the summer's failing breath, And the hopes that without fruition Were doomed to darkness and death.

Twas the longing for one whose welcome Was ever the first and best, Tho lies asleep on the hillside

With the sod on her gentle breast Wilt thou guard that peaceful slumber?

She was so faithful and dear. Can I feel through the shining autumn That one that she loved is near?

For though she is gathering blossoms 'Mid the beautiful fields of God, Her spirit is bending and watching, She remembers us, goldenrod! -Christian Work.

#### COMBINE AGAINST GERMANY

A Proposal For Russia, England and Frauce to Unite-China Refuses to Grant the Kaiser's Demands Unless Her Territory Is Vacated.

St. Petersburg, Nov. 27.-The Novosti contends that the growth of German influence in the near and far east will necessitate a union of Great Britain, Russia and France for the protection of their interests.

LONDON, Nov. 27.—Special dispatches received here from Shanghai say that Baron Von Heyking, the German minister to China, has presented to the Chinese government the demands of Germany for reparation for the recent murder of German missionaries and the destruction of German mission property. These demands include the discovery and execution of the murderers of the missionaries, Nies and Hennle, the punishment of the implicated officials, the reconstruction of the mission building, with the payment of an indemnity of 60,000 taels to the relatives of the victims and also the payment of a heavy indemnity to cover the expenses of the German naval expedition and the maintainenance of the German force at Kiao-Chou bay.

The Chinese government replied that Kiao-Chou bay must be evacuated before the demands can be discussed. Baron Von Heyking refused to consent to this, and a deadlock was the result.

The foreign diplomats, the special dispatches further announce, say that the German conditions are impossible of acceptance, and they assert that they were only presented to enable Germany to retain Kiao-Chou bay and to extend northward her hold of Chinese terri-

It is reported that Chang Koayan, the Chinese general who was in command of the fortifications at Kiao-Chou bay, and who surrendered to the Germans without firing a shot, has been condemned to death by the Chinese war coancii.

The vicerovs of Canton, Foo-Choo and Nanking are trying to put the coast defenses in a proper state of repair, with the view of preventing possible further seizures of Chinese terri-

## WAR RUMOR DISCREDITED.

English and French Officials Question Reports of Fighting In Africa.

Paris, Nov. 27.-M. Lebon, the minister of the colonies, has received no information of a collision between the British and French troops at Nikki, in the Niger region and discredits the

LONDON, Nov. 27.-The colonial office has received a cable message from Lagos, west coast of Africa, stating that a rumor is current among the natives there of a collision between 400 British and French troops. The report. it is believed, will prove to be founded on a conflict between the French and some natives.

The French have been aiming at the establishment of a great African empire, and dispatched expeditions to the Hinterland of Lagos and Carnotville to establish headquarters.

The British Niger company, however, getting wind of the French plans, dispatched Captain (now Major) Lugard to Nikki, the capital of Burgu, for the purpose of negotiating a treaty with the native ruler, and the English officer was fortunate enough to reach there before a French officer, Commandant Decoeur, who was bound for the same place and with the same intention, although the latter had the start, Lugard secured his treaty and carried is away three weeks before Decoeur ar-

The French, however, seemed to have chosen to disregard this fact and have dispatched armed expeditions, not only to Nikki, but to Broussa, which has all along been acknowledged to be within the sphere of British influence. To settle these and other questions in dispute, commissioners, representing Great Britain and France, are now tardily beginning to deliberate in Paris.

The case of H. M. Hughes against Samuel Strickline was before the mayor this afternoon at 2 o'clock, but was postponed indefinitely.

The cool weather of the last few nights has caused several bums to apply for a night's lodging at the jail. Last night two were given shelter.

Mrs. George Buxton, who was very ill for several months, is very much improved, and there is now no thought but that she will soon be well.

Miss Mary Vodrey entertained about 25 members of her Sunday school class at her home in Robinson street yesterday. An excellent musical and literary program was rendered, and all spent the time delightfully.

Superintendent Rayman, in company with Miss Updegraff and Miss Fransisco, of the high school, left this morning for Steubenville, where they attended the closing session of the Eastern Ohio Teachers' association.

The West Market street sewer yesterday became clogged and a force of men are today removing the obstruction. The sewer has not the necessary fall, and causes more trouble than any other sewer in the city.

J. J. McCormick, general agent of the Cleveland and Pittsburg road with offices in Bellaire, was in the city today the guest of Freight Agent T.J. Thomas. There was no special significance attached to his visit.

D. C. Simmers left this afternoon for Uhrichsville, where he was called by the death of his aunt, Miss Deliah Cunning, who died at her home in Tuscarawas yesterday morning. The funeral will take place Monday morning.

A horse owned by Calvin Croft ran off yesterday afternoon, near Spring Grove, and badly damaged the buggy. The animal was being driven by Will Croft. A small child, also in the buggy, was thrown out, but escaped injury.

Supervisor Hickey and a force of workmen today finished the work of cleaning the sidings of all the dirt that has accumulated there during the past year. Between some of the tracks the dirt was rail high. The cleaning was an improvement that was much needed.

George F. Brunt now holds the record of the city in live bird shooting. At the private match held at Rock Spring, Thursday afternoon, he succeeded in killing 29 out of a possible 30, missing his first bird. This a record never equalled here, and will probably stand for a good many years.

The social held last evening at the Grand Army was well attended. D. B. Mackey gave a very pleasing address on the "American Soldier" and speeches were made by D. J. Smith, A. J. L. Kerr and Mrs. M. E. Calhoun. Solos were rendered by Colin McLane and Fred Croxall, and were heartily enjoyed. Lunch was served.

The water works trustees met last evening and discussed the situation in regard to their trouble with the light company. Judge P. M. Smith was present, and made a statement in behalf of the light company asking a lower tends its achievements. Living for water rate. He was given no definite answer, and the request will be taken under consideration at the next meeting of the board.

Mr. Gamble will resume his recital tour June 1.

#### CHRISTIAN ENDEAVOR.

Topic For the Week Beginning Nov. 28. Comment by Rev. S. H. Doyle.

TOPIC.—"How can we consecrate ourselves to the temperance and other reforms?"—Luke i, 5-17. (International Temperance Sunday.)

The Scripture quoted in the reference tells the story of the visit of the angel to Zacharias, to whom he foretold the birth of John the Baptist, who was to be great in the sight of the Lord and drink neither wine nor strong drink, but to be filled with the Holy Ghost. John was a total abstainer. He was also a great reformer and may appropriately introduce us to the study of temperance reform

That there is need of consecration to temperance and other reforms is apparent to all. The indifference of Christian people to the one power that is destroying more human beings both for time and for eternity is appalling. When we know that millions of dollars are spent annually, thousands of homes are ruined, thousands of persons go down to drunkards' graves; that the souls of men are lost and their bodies brutalized and wives are murdered and children starved, all because of the curse of drink, it would seem that the whole thurch would be in arms against it. Yet It is not. The Christian world largely sleeps while the temporal lives of millions are ruined and their souls damned for eternity.

What can we do in this great reform? First.—Practice temperance. Every Christian Endeavorer should be a total abstainer. Our influence will be against temperance unless we practice it.

Second. - Educate public opinion against intemperance. When the people want intemperance and the saloon to go, they will go. They will not go before. It is not so much the laws that need to be reformed as the people. Reform the laws and not the people, and laws become a dead letter. Reform the people, and they will demand that the laws be reformed and enforced. The temperance campaign must be a campaign of education, and not a campaign of strifes, contentions and disputations among those who are arrayed against this great evil. And what a boundless opportunity the Christian Endeavor organization has for educating the youth of the world upon this subject! Let us teach young and old that drink is unnecessary, that it is not beneficial to body, mind or soul and that it is disastrous and ruinous both for time and eternity.

Third.—Hold up Christ and the cross to the world. The cross of Christ is the only remedy that can reach down into the depths of this foul pool of iniquity. Human methods of reform may ameliorate the condition of men and are not to be despised, but the only method that can save them is the divine method. Fill a man with Christ, and there will WAR RUMOR DISCREDITED. be no room for strong drink.

Bible Readings.—Lev. x, 8-11; Num. vi, 1-4; Deut. xxi, 18-21; Prov. xx, 1; xxiii, 29-31; Isa. v, 11; xxviii, 1-4; Dan. i, 1-15; Math. v, 13-16; Luke xii, 45, 46; xxi, 34; Rom. xiii, 12-14; I Cor. v, 11; Gal. v, 19-26.

#### A Slice of Human Nature.

Why is it that when one or two rich but stingy members belong to a church all the rest are prone to measure their obligations by the standard set by their richer brethren? And why is it that when a poor washerwoman, for instance, sets the example of sacrificing until it hurts and pinches, her more favored brethren do not think of making her giving the standard by which to measure their obligations? The only answer we can give is that nature in most cases is still stronger than grace. To be liberal toward oneself is the first lesson we have learned, to be liberal toward God is the second lesson, and to learn it we must unlearn what our first instructor, the old Adam, taught us .-Lutheran.

#### They Cannot Understand.

Persons who can most readily understand how they might have become as intelligent, cultured and noble as others who have been born in loftier stations rived at Nikki. are often totally unable to understand how, had they been born in the slums, they could have become like the vice and degradation by which they would have been surrounded. They can understand how exaltation might have helped them upward, but they cannot understand how degradation would have helped them downward. - Lutheran Ob-

#### The Christian's Is the Eternal Life.

It is perfected by the sufferings and struggles of the present. All things work together for its good. The fire purifies it, the battle gives its powers exercise, the darkness makes it to grow the more rapidly and persecution ex-Christ is the one thing worth living for. —Christian Statesman.

#### Being Appreciated.

It is pleasant to be appreciated. Persons work better when they know that their efforts command approval. Nothing is lost by kindly words of interest and recognition. Flattery is offensive, but appreciation of another's kindness and service is always acceptable. - Presbyterian.

The First Goldenrod.

I thought not of the added beauty To the glow of the golden noon But this was the greeting I gave thee-'Has the goldenrod come so soon?'

Twas the ghost of the flying springtime And the summer's failing breath, And the hopes that without fruition

Twas the longing for one whose welcome Was ever the first and best, Tho lies asleep on the hillside With the sod on her gentle breast

Were doomed to darkness and death

Wilt thou guard that peaceful slumber?

She was so faithful and dear. Can I feel through the shining autumn That one that she loved is near?

Mid the beautiful fields of God, Her spirit is bending and watching, She remembers us, goldenrod! -Christian Work.

For though she is gathering blossoms

#### COMBINE AGAINST GERMANY

A Proposal For Russia, England and France to Unite-China Refuses to Grant the Kaiser's Demands Unless Her Territory Is Vacated.

St. Petersburg, Nov. 27.-The Novosti contends that the growth of German influence in the near and far east will necessitate a union of Great Britain, Russia and France for the protection of their interests.

LONDON, Nov. 27.—Special dispatches received here from Shanghai say that Baron Von Heyking, the German minister to China, has presented to the Chinese government the demands of Germany for reparation for the recent murder of German missionaries and the destruction of German mission property. These demands include the discovery and execution of the murderers of the missionaries, Nies and Hennle, the punishment of the implicated officials, the reconstruction of the mission building, with the payment of an indemnity of 60,000 taels to the relatives of the victims and also the payment of a heavy indemnity to cover the expenses of the German naval expedition and the maintainenance of the German force at Kiao-Chou bay.

The Chinese government replied that Kiao-Chou bay must be evacuated before the demands can be discussed. Baron Von Heyking refused to consent to this, and a deadlock was the result. The foreign diplomats, the special dispatches further announce, say that the German conditions are impossible of acceptance, and they assert that they were only presented to enable Germany to retain Kiao-Chou bay and to extend northward her hold of Chinese terri-

It is reported that Chang Koayan, the Chinese general who was in command of the fortifications at Kiao-Chou bay, and who surrendered to the Germans without firing a shot, has been condemned to death by the Chinese ar council.

The vicerovs of Canton, Foo-Choo and Nanking are trying to put the coast defenses in a proper state of repair, with the view of preventing possible further seizures of Chinese terri-

English and French Officials Question DEMITICIII Reports of Fighting In Africa.

Paris, Nov. 27.-M. Lebon, the minister of the colonies, has received no information of a collision between the British and French troops at Nikki, in the Niger region and discredits the report.

LONDON, Nov. 27.-The colonial office has received a cable message from Lagos, west coast of Africa, stating that a rumor is current among the natives there of a collision between 400 British and French troops. The report, it is believed, will prove to be founded on a conflict between the French and some natives.

The French have been aiming at the establishment of a great African empire, and dispatched expeditions to the Hinterland of Lagos and Carnotville to establish headquarters.

The British Niger company, however, getting wind of the French plans, dispatched Captain (now Major) Lugard to Nikki, the capital of Burgu, for the purpose of negotiating a treaty with the native ruler, and the English officer was fortunate enough to reach there before a French officer. Commandant Decoeur, who was bound for the same place and with the same intention, although the latter had the start. Lugard secured his treaty and carried 13 away three weeks before Decoeur ar-

The French, however, seemed to have chosen to disregard this fact and have dispatched armed expeditions, not only to Nikki, but to Broussa, which has all along been acknowledged to be within the sphere of British influence. To settle these and other questions in discommissioners, representin Great Britain and France, are no tardily beginning to deliberate in Paris
